Versteigerungsbedingungen

Mit der Teilnahme an der Versteigerung werden folgende Bestimmungen anerkannt: Die angegebenen Preise sind Schätzpreise in Schweizer Franken. Der Ausruf erfolgt in der Regel bei 80 %, sofern nicht höhere Angebote vorliegen. Zum Ersterstehungspreis wird ein Aufgeld von 15 % sowie zusätzlich die Warenumsatzsteuer von 6,2 % auf Silbermedaillen und -münzen und auf Goldmedaillen hinzugerechnet, sofern die Auslieferung in der Schweiz stattfindet. Der Gesamtpreis ist nach erfolgtem Zuschlag fällig und bei der Aushändigung in Schweizer Franken zu bezahlen.

Für verspätete Zahlungen berechnen wir die banküblichen Verzugszinsen.

Der Zuschlag erfolgt nach dreimaligem Aufruf des höchsten Gebotes und verpflichtet zur Annahme. Schriftliche Gebote haben den Vorrang. Jeder Ersteigerer verpflichtet sich für die durch ihn getätigten Käufe persönlich. Er kann nicht geltend machen, für Rechnung Dritter gehandelt zu haben.

Für die Echtheit der Münzen wird vorbehaltlos und zeitlich unbeschränkt garantiert. Alle Angaben im Katalog wurden nach bestem Wissen und Gewissen zusammengestellt.

Der Versand der Münzen erfolgt normalerweise eingeschrieben und versichert zu Lasten des Empfängers. Im Ausland verrechnete Gebühren und Steuern gehen zu Lasten des Käufers. Es obliegt dem Erwerber, sich über ausländische Zoll- und Devisenvorschriften zu informieren. Die Veranstalterin der Auktion übernimmt keine Haftung für allfälliges Zuwiderhandeln solcher Vorschriften.

Der Auktionator ist befugt, von der im Katalog aufgeführten Reihenfolge abzugehen und Nummern zu vereinigen. Es erfolgt keine Aufteilung der Lose. Erfüllungsort und Gerichtsstand im Verhältnis zwischen der Veranstalterin und dem Erwerber ist Zürich. Die Abgabe eines schriftlichen oder mündlichen Gebotes bedeutet gleichzeitig die Anerkennung der vorerwähnten Auktionsbedingungen. Im übrigen kommen die ortsüblichen Gantbedingungen zur Anwendung. Vorliegende Bedingungen liegen in deutscher, französischer, italienischer und englischer Fassung auf. Bei Meinungsverschiedenheiten ist die deutsche Fassung massgebend.

Conditions de la vente aux enchères

En participant à la vente, les conditions suivantes sont considérées comme acceptées.

Les prix indiqués sont des prix estimatifs en francs suisses.

La vente débute en principe avec 80 % du prix d'estimation, pour autant qu'il n'y ait pas d'offres plus élevées. Sur le prix d'acquisition une majoration de 15 % sera prélevée et, en supplément, l'impôt sur le chiffre d'affaire de 6,2 % (I.C.H.A.). Ceci pour les médailles et monnaies en argent et les médailles en or, si la livraison a lieu en Suisse. Le prix total, y compris les majorations, est payable en francs suisses à réception des médailles et monnaies.

En cas de paiements tardifs, nous calculons un intérêt de retard au cours bancaire.

L'adjudication a lieu après le 3^e rappel de l'offre la meilleure et oblige l'acheteur à prendre son acquisition.

A prix égal, les offres écrites ont la priorité.

Chaque participant à la mise s'oblige pour les achats effectués par lui-même. Il ne peut faire valoir, avoir agi pour un tiers.

Nous garantissons l'authenticité des monnaies sans conditions et sans aucune limite de temps. Les indications de notre catalogue ont été étudiées avec le plus grand soin.

L'envoi des pièces a lieu en principe, inscrit et assuré, aux frais du destinataire. Pour l'étranger, toutes taxes ou impôts prélevés sont à la charge du destinataire. L'acquéreur doit lui-même s'informer sur les prescriptions douanières et des devises du pays d'importation. La maison organisatrice de la vente ne peut être tenue pour responsable au cas où les prescriptions mentionnées ci-dessous ne seraient pas respectées. L'organisateur de la vente est autorisé à modifier l'ordre figurant dans le catalogue et à associer plusieurs numéros. Les lots ne seront pas séparés. Comme domicile juridique, il est admis entre l'organisatrice et les acheteurs, Zurich, ceci en cas de différences.

La remise d'une offre écrite ou verbale signifie en même temps l'acceptation des conditions précitées de vente aux enchères. Les conditions locales de mise aux enchères seront appliquées et celles-ci sont disponibles dans les langues allemande, française, italienne et anglaise. En cas de différences d'interprétation, le texte allemand fait foi.

Condizioni di vendita

La partecipazione alla vendita all'asta comporta l'accettazione integrale delle presenti condizioni. I prezzi indicati a fianco di ciascun lotto rappresentano la stima in franchi svizzeri. Se non sono pervenute offerte più elevate del prezzo di stima, l'inizio di battuta d'asta corrisponde generalmente all'80 % circa dello stesso prezzo di stima. Al prezzo di aggiudicazione verrà aggiunto un diritto d'asta del 15%. Inoltre sarà aggiunta l'imposta svizzera sulla cifra d'affari (I.C.H.A.), ammontante al 6,2%, per le medaglie e le monete d'argento e di bronzo e per le medaglie d'oro consegnate all'acquirente in territorio svizzero. L'importo complessivo sarà esigibile al momento dell'aggiudicazione e pagabile in franchi svizzeri alla consegna dei lotti. In caso di ritardo nel pagamento sarà applicato l'interesse bancario sull'importo dovuto.

L'aggiudicazione avviene dopo la terza chiamata della migliore offerta ed obbliga l'offerente ad accettarla.

In caso di parità di offerte, avrà la precedenza quella effettuata dall'offerente per corrispondenza.

Ogni partecipante alla vendita all'asta è personalmente responsabile degli acquisti effettuati: pertanto egli non può pretendere di avere agito per conto di terzi.

Gli oggetti offerti in vendita sono garantiti autentici senza limiti di tempo.

L'invio degli oggetti viene di regola effettuato in plico postale raccomandato a spese ed a rischio del destinatario, il quale, se residente all'estero, dovrà assumere a proprio carico ogni eventuale tassa o imposta applicata nel paese di residenza sul contenuto del plico raccomandato. E' onere dell'acquirente di informarsi sulle prescrizioni doganali e valutarie del paese di importazione e la società organizzatrice della vendita all'asta non può essere ritenuta responsabile nel caso in cui esse non vengano rispettate.

Il commissario d'asta ha il diritto di modificare l'ordine di vendita del catalogo e di riunire più lotti mentre, per contro, non può suddividere i lotti costituiti di due o più pezzi.

In caso di controversia è competente il foro di Zurigo.

L'inoltro di un'offerta scritta o verbale implica l'accettazione senza riserve delle presenti condizioni d'asta.

Saranno inoltre applicabili le consuetudini locali sulle vendite all'asta, il testo delle quali è disponibile nelle lingue tedesca, francese e inglese: in caso di divergenze di interpretazione farà fede il testo in lingua tedesca.

Conditions of sale

The following conditions are acknowledged by all persons participating in the Auction:

The estimates are in SwissFrancs. The opening bids will be about 80 % of estimate, unless there are higher offers. Additional to the realized prize are a 15 % commission and 6,2 % sales tax on silver and bronze coins and gold medals delivered in Switzerland.. The total price is due after the final bid and payable on delivery.

Late payment of invoice will incur interest at bank rate.

The hammer price is on the highest bid and the purchaser is responsible for payment. Written bids have preference over room bids.

The buyer cannot claim to act on behalf of a third person.

The authenticity of the coins is unconditionally guaranteed, without time limit. All identifications of the items sold in this catalogue are statements of opinion and made in good faith.

The dispatching of purchases is normally registered and insured, payable by the purchaser. The purchaser is responsible for any dues or taxes outside of Switzerland and is advised to acquaint himself with the formalities. The Auctioneer cannot be responsible for contraventions.

The Auctioneer may change the sequence of the catalogue or unite lots; lots however cannot be divided.

The Auction is held in Zurich and any legal questions arising shall be determined in Zurich.

A buyer, consigning commissions or executing room bids, acknowledges the acceptance of the above conditions.

The usual conditions applied to Auction sales held in Zurich are here reiterated. The above mentioned conditions are written in German, French and English; the only legal valid text is German.

Die Auktion erfolgt unter Mitwirkung eines Beamten des Stadtmannamtes Zürich l. Jede Haftung des anwesenden Beamten, der Gemeinde oder des Staates, für Handlungen des Auktionators entfällt.

Time table Zeittafel Ordre de vente Ordine di vendita

Wednesday, 26 May 1993	9.30 hrs.	Nr. 1 - 346
	14.00 hrs.	Nr. 348 - 549

Arcadius to Constantine XI

The Coinage of the Eastern Empire

The mint is Constantinople unless otherwise stated

Arcadius, 383-408

- 1 Solidus, 19 Jan. - Oct. 383, AV 4.53 g. DN ARCADI-VS PF AVG Draped and cuirassed childlike bust r. wearing pearl diadem. Rev. CONCORDI-A AVGGG Z Constantinople seated to front, head r., holding long sceptre in r. hand and globe in l.; r. foot on prow. In exergue, CONOB. RIC 47 c var. Rare. Virtually extremely fine 1,800.-
- 2 Solidus, 383-386, AV 4.45 g. As previous but rosette diadem and rev. legend ends AVGGG S. RIC 46 g. Scarce. A particularly nice example. Extremely fine 1,800.-
- 3 Solidus, 387, AV 4.45 g. As last, but fuller bust Rev. CONCORDI-A AVGGG H Constantinople seated facing, holding sceptre and shield with VOT/V/MVL/X, resting on pillar, r. foot on prow; in exergue, CONOB. RIC 70 c. Scarce. Good extremely fine 1,800.-
- 4 Tremissis, 387-392, AV 1.49 g. D N ARCADI-VS P F AVG. As previous, but pearl diadem. Rev. VICTORIA AVGVSTORVM Victory advancing r., holding wreath and globus cruciger; in exergue, CONOB. RIC 75 c. Scarce. A very light graffito on reverse. Extremely fine 800.-

Ex Auctiones sale 12, 1981, 645.

- 5 Solidus, 393-395, AV 4.46 g. As previous, but older bust. Rev. VICTORI-A AVGGG Emperor standing r., holding labarum in r. hand and globe surmounted by Victory in l., spurning captive with l. foot; in field, S-M; in exergue, COMOB. RIC 14 B ("Sirmium"). Cf. DOC 161/162. Nearly extremely fine 1,250.-

Ulrich-Bansa's interpretation of S - M as Sacra Moneta (NC 1952, 155-6, reviewing RIC IX) has been confirmed by Grierson and Mays (DOC pp. 119-120); the formula emphasises the official and "sacred" character of the solidi in contrast to the irregular issues of Maximus and Eugenius in the West.

- 6 Solidus, Milan 394-402, AV 4.48 g. As previous, but mature bust. Rev. VICTORI-AVGGG As previous but in field M-D. RIC 35 B. DOC 265. Extremely fine 1,600.-

Honorius, 393-423

- 7 Solidus, Ravenna 402-423, AV 4.46 g. DN HONORI-VS PF AVG As previous. Rev. VICTORI-AVGGG As previous, but in field R-V. DOC 735. C. 44. Very fine 575.-
- 8 Solidus, 402-423, AV 4.46 g. Similar to previous. DOC 735. C. 44. Very fine/nearly extremely fine 800.-

Theodosius II, 402-450

- 9 Solidus, 408-419, AV 4.49 g. DN THEODO-SIVS P F AVG Armoured bust, diademed and helmeted, three-quarter facing, spear in r. hand and shield on l. shoulder. Rev. CONCORDIA AVCC S Constantinopolis seated facing, holding spear and globe surmounted by Victory; in exergue, CONOB. MIRB 12 a. DOC 316. A superb example, about as struck 1,200.-
- 10 Solidus, 422/3, AV 4.40 g. As previous. Rev. VOT XX MVLT XXX H Victory standing l., holding long jewelled cross; in exergue, CONOB. MIRB 15 b. DOC 352. Magnificent and about as struck 1,200.-

- 11 Solidus, 422/3, AV 4.48 g. As previous, but rev. legend ends Γ. MIRB 15 b. DOC 350. Good very fine 800.-
- 12 Solidus, 426-430, AV 4.47 g. As previous. Rev. SALVS REI-PVBLICAE H Theodosius and Valentinian III seated facing, each in consular robes and holding mappa and cross-sceptre; above, star, and in exergue, CONOB. MIRB 23 b. Ratto 158. About extremely fine 1,200.-
- 13 Solidus, 442/3, AV 4.48 g. As previous. Rev. IMP XXXX II COS X VII P.P.P. Constantinopolis enthroned l., holding globus cruciger and long sceptre, l. foot on prow and shield by l. side; in field l., star, and in exergue, CONOB. MIRB 33ba. DOC 414. A brilliant extremely fine 1,100.-

Ex Sotheby New York sale, December 1990, Hunt collection, 47.
- 40 Half-follis, 512-517, AE 8.86 g. As previous. Rev. Constantinopolis seated l. on throne with square back, holding globus cruciger in r. hand, l. elbow on shield, r. foot on simplified prow; in field l. and r. K and star, and in exergue, CON. DOC-. MIB 20. S 25a. Extremely rare, pierced, otherwise nearly very fine 1,800.-

This most exceptional issue, which, according to Hahn, falls between the years 512 and 517, is struck on the weight standard of the large series but in the size and weight of the small series. This coin, however, is struck at the size weight of the heavy series. The reason for the startling design is unknown but it may celebrate a refounding of Constantinople after the end of the revolt of Vitalian, 513-515. Hitherto only two folles of this type were known (Berlin and London), a single half-Follis, (Dumbarton Oaks) and a dekanummia (Barber Institute). This specimen, the only one not in a museum, clearly shows that unlike the folles, the half-folles did not bear an officina letter. It is interesting to note that the owner who pierced the coin may have done so because of the unusual nature of the reverse.

- 41 Solidus, Thessalonica 492-518, AV 4.39 g. DN ANASTA-SIVS PPAVG Armoured bust three-quarters facing, trefoil on diadem. Rev. VICTORI-AAVGGG. Victory standing l. holding long voided cross, six-pointed stars to l. and r., and in exergue, CONOB. DOC 27. MIB 15. S 30 var.
Extremely rare and exceptionally well struck with polished dies, the details of the shield clearly engraved.
Virtually mint state 5,000.-
Illustrated on colour plate 1. Ex Vecchi-Bonham sale 3, 1980, 9.
The style of this coin is very fine and somewhat different for the normal Thessalonican issues. Lacam in CMB pp. 168/9 draws attention to the use of the six-pointed star at the mint of Rome.

Justin I, 518-527

- 42 Solidus, 518-522, AV 4.49 g. DN IVSTI-NVS PPAVG Similar to previous. Rev. VICTORI-AAVCCC B Victory standing l., holding staff surmounted by reversed simple Christogram, in l. field, star, and in exergue, CONOB. DOC 1. MIB 2. S 55.

Graffito on obverse, about extremely fine 375.-

In volume 1 of DOC Bellinger attributed all broad-faced solidi of Maurice to Antioch because he considered that the officina letters ΘS on broad-faced light weight solidi represented the mint name Antioch. Since a ΘS Solidus, of the nine day joint reign of Justin II and Tiberius Constantine shares its obverse die with regular Constantinopolitan solidi, it will be seen that there is no evidence for any issue of gold for Maurice at Antioch.

Bendall, NCirc. vol. 92, 8 (Oct 1984) "A New mint for Focas" Fig 2 (this coin).

Very rare. Virtually extremely fine 2,000.-

Ex Sternberg sale 12, 1982, 911.

Neither Grierson nor Hahn seem to have noticed the unusual style of this coin and its companion pieces such as DOC 5 b. 2 and H. pl 29/5. Despite their superiority in style and production to the regular Constantinopolitan coinage, they are still included with them. In fact they form a coherent series starting with the early legend FOCA-E with pendilia (MIB 3) changing to FOCA-S with pendilia and progressing (MIB 5) to FOCAS- without pendilia (DOC 562).

- 109 Tremissis, AV 1.45 g. DN FOCAS-PERPAVG. Diademed, draped and cuirassed bearded bust r. Rev. VICTORIA AVCC H Cross potent; in exergue CONOB. DOC 17. MIB 35var (Carthage). 9632. NCirc. vol 92, 8, figs 9 and 11 var.

Rare. Good very fine 600.-

The article in the October 1984 Numismatic Circular discusses this type and its companion semisses; officina H was hitherto unrecorded but it is one of the officina letters recorded for the solidi above.

- 110 Solidus, contemporary undetermined mint, ca. 607-609, debased AV 4.51 g. As lot 100, but in extremely irregular style. Extremely fine 2000.-

Revolt of the Heraclii, 608-610

- 111 Solidus, Cyprus (?) 607/8, AV 4.43 g. DN ERACLIO CONSVLI BA Facing busts of the Heraclii, father and son, wearing consular robes; above, cross. Rev. VICTORIA-CONSV B IA Cross potent on four steps; in exergue, CONOB. DOC 11. MIB 3 (this obverse die). S 719 (Alexandria). Extremely rare. Very fine 5,000.-

Illustrated on colour plate 1

It seems certain that coins of the revolt were struck at three different mints. Carthage and Alexandria are certain for the other two types, but where this was struck is uncertain. Cyprus seems extremely unlikely since the style is totally unlike that of the bronze coins struck in the island.

Heraclius, 610-641

- 112 Solidus, 610-611, AV 4.51 g. dNN hERACLI-PER AVG Crowned and helmeted bust facing with no pendilia, holding globus cruciger, Rev. VICTORIA-AVGVI Cross potent on two steps; in exergue CONOB. DOC -. MIB 1a/2 (this coin) S-. Of the greatest rarity, possibly unique. Slightly off centre, extremely fine/almost fdc 1,800.-

Hahn fails to note that while his number 1a/1 has the pendilia, this coin lacks them as it was usual in the previous reign.

Ex Vecchi-Bonham sale 3, 1980, 109 and Kress sale 152, July 1971, 846.

Extremely rare and fine/very fine 2,000.-

In 638, during the reign of Heraclius, Jerusalem was surrendered by the patriarch Sophronius to the troops of the second Caliph. Omar. Christians remained unmolested and Jews were allowed to return and practise their religion. It would seem, by the evidence of this coin, that Constans II-type folles were permitted, and were compatible with the Arab-Byzantine fals coinage, until the Umayyad reform during the latter part of the reign of Abd al-Malik (685-705)

- 167 12-nummi, Egypt 646-668, AE 9.54 g. Crude bust of crowned emperor facing between palm-branch and star. Rev. Large M between I and B; in exergue, ABAZ. MIB pl. 30, X35. Walker p. 53, fig 10.

EMPIRE OF THESSALONICA

Theodore Comnenus-Ducas, 1224-1230

- 314 Trachy, Thessalonica, AR 3.23 g. ΜΡ ΘΥ ΗΑΓΗΟCΟ-ΡΗΤΗC in two columns. The Virgin Hagiosoritissa, standing, orans, wearing tunic and maphorion, two stars in field. Rev. ΘΕΟΔΩΡΟΣ ΔΕCΠΟΤΙC-Ο ΑΓΙ(ΟC ΔΙΜΙΤΡΙΟC) Emperor, r., standing, crowned by manus Dei and wearing crown and loros, and St. Demetrius, r., wearing military costume, giving model of the city walls to the emperor. H. pl. 37/4. S 2159.

Very rare. Light graffiti on margin. About extremely fine 1,800.-

- 315 Trachy, AE 4.94 g. Christ seated facing between IC and XC on backless throne, r. hand raised in benediction, Gospels in l. Rev. ΘΕΟΔΩΡΟΣ-ΧΜ Similar to previous, but the archangel Michael in the place of St. Demetrius. H. pl. 38/4. S 2165.

Rare. Very fine 200.-

Manuel Comnenus-Ducas, 1230-1237

- 316 Trachy, Thessalonica, AE 3.01 g. ΟΑΓΙΟC-ΔΗΜΙΤΡΟ in two columns. Facing half-length figure of St. Demetrius, wearing military costume, holding spear over r. shoulder. Rev.(ΜΑΝΩΗΑ) Manuel l., standing, wearing crown and panelled chlamys, holding sceptre cruciger in r. hand and akakia in l. hand, crowned by Christ, r., wearing tunic and colobion and holding Gospels in l. hand; in field, IC XC and star. H. pl. 39/3. S 2177.

Rare. Slight double striking, otherwise good very fine 200.-

RESTORED EMPIRE

Michael VIII Palaeologos, 1258-1282

- 317 Hyperpyron, AV 4.05 g. Bust of the Virgin, orans, within walls with six groups of towers; star in field. Rev. XM ΔEC ΠOT in column. Emperor, l., wearing crown and jewelled loros and supported by the archangel Michael standing behind him, kneeling before Christ, r., seated on backless throne, wearing tunic and colobion and holding scroll; in field, XM and IC-XC. Gr. 1288. S 2242. Bendall, Sigla, 90. Crudely struck. Very fine 300.-
- 318 Trachy, Thessalonica, AE 1.96 g. ΓOA ΔIM-TPOC in two columns. Facing bust of St. Demetrius wearing military costume, holding sword over r. shoulder and shield on l. Rev.(MIXAHA ΔECΠ) Standing figure of emperor, l., blessed by manus Dei and wearing crown and jewelled loros, and archangel Michael, r., in military costume, holding sword between them. Gr. 1370. S 2296. PCPC 65. Rare. Good very fine 200.-

Andronicus II Palaeologos, 1282-1332

- 319 Hyperpyron 1310-1330, AV 3.75 g. Obverse as no. 317 but only four groups of towers on city walls; K N and stars in field. Rev. ANAPONICOS - (MIXAHA) in two columns. Andronicus, l., and Michael r., each wearing crown and jewelled loros, kneeling on either side of standing figure of Christ, wearing tunic and colobion, who blesses the two emperors, IC-XC in upper field. Gr 1293. S 2396. Bendall, Sigla, 186. Very fine 300.-
- Ex Vecchi-Bonham sale 3, 1980, 394.
- 320 Hyperpyron 1294-1310, AV 4.00 g. As previous, but on obverse six groups of towers; K Π in field, without stars. Rev. As previous, but figures of the two emperors transposed. Gr. 1292 var. S 2396 note. Bendall, Sigla 77. Rare. Some weakness. About very fine 500.-
- Ex Vecchi-Bonham sale 3, 1980, 397.

Manuel II Palaeologos, 1391-1423

- 321 Stavraton, AR 6.18 g. Facing nimbate bust of Christ; MK - lily in field. Rev. Double inscription around facing bust of Manuel wearing domed crown and maniakon. PCPC 332, Sigla 11. S 2549. Good very fine 300.-
- 322 Half-stavraton, AR 3.80 g. Facing nimbate bust of Christ, in field r. three pellets. Rev.+MA(NOVH)Λ BACIA (EVCOΠ)AA around bust of Manuel, wearing crown and maniakon. PCPC 334. 8, Sigla 23 (these dies). S 2551. Good very fine 250.-

John VIII Palaeologos, 1423-1448

- 323 Stavraton, AR 6.69 g. Facing bust of Christ; · I · in r. field. Rev. ΙΩΑΝΗΣ ΔΕΣΠΟΤΗΣ ΟΠΑΛΕΟΓΟΣ/ΘΥ ΧΑΡΙΤΙ ΑΥΤΟΚΡΑΤΟΡ in double border around crowned bust of John to front, wearing maniakon. PCPC 348.9, Sigla 7. S 2563. Good very fine 250.-

Constantine XI Palaeologos, 1448-1453

- 324 Stavraton, AR 6.61 g. Facing bust of Christ, pellets in border. Rev.(+ΚΩΝΣΤΑΝΤΙΝΟΣ ΔΕΣΠΟΤΗΣ ΟΠΑΛΕΟΛΟΓ)/ΘΥ ΧΑΡΙΤΙ Η ΒΑΣΙΛΕΥΣ ΤΟ ΠΟΜΕΟΝ in double border around bust of Constantine wearing crown and maniakon. S. Bendall RN, 6th series, vol 33, 1991, "The coins of Constantine XI", no. 78 (this coin). S -. Of the highest rarity and historical importance. Very fine 9,000.-

EMPIRE OF TREBIZOND

Manuel I Comnenus, 1238-1261

- 325 Asper, AR 2.90 g. OAGIOC-EVTENHIO in columns. St. Eugenius standing, wearing long robes and holding long cross in r. hand; stars and pellets in field. Rev. MNIA-OKH in columns; Manuel standing, wearing crown and loros, holding labarum in r. hand and akakia in l.; manus Dei above and stars and pellets in field. BMCV. 91. S 2601.
Extremely fine 100.-

Medallions and Weights

- 326 Uniface medallion, 10th-11th century, AE 95.34 g. Nimbate bust of Christ facing between IC and XC, wearing pallium and colobion, r. hand raised in benediction before body, l. holding Gospels.
Cast and engraved and pierced for suspension. Green-brown patina very fine 2,500.-
Illustrated on colour plate 3.
- 327 Uniface medallion, 10th-11th century, AE 46.09 g. The Virgin orans between MP and ΘV, hands before body; she is nimbate and wears pallium and maphorion; all within raised border of large annulets engraved.
Cast and engraved. Very fine 800.-
- 328 Square engraved bronze weight of 18 solidi, 35 x 35 mm, 76.06 g. Raised octagonal plaque inscribed with S O L / X + GII, all within laurel-wreath and foliate borders and reserves. Rev. Blank. Cf. Dürr 265.
Rare. Fine green patina. Very fine 600.-
- 329 Square engraved bronze weight of 1 ounce (6-solidi), 22 x 21 mm, 25.30 g. Obv. Γ - A beneath long cross; all inlaid in niello Rev. SOL VI. Dürr 72.
Green patina. Very fine 350.-
- 330 Square engraved bronze weight of 1 ounce, 24 x 20 mm, 26.36 g. Γ - A flanking long cross; in each upper corner, star of six pellets. Cf. Dürr 96.
Green patina. Very fine 250.-

Multiple lots

Constantinople mint unless otherwise noted

- 331 Bronze coins (23): Justin I, penta; Justinian I, penta, Antioch; Tiberius Constantine, 3/4 follis, follis, Antioch; Maurice Tiberius, follis; Heraclius, 12-nummi, Alexandria; Constans II, folles (3), Sicily; Leontius, follis, Sicily; Leo III, follis, Sicily; Leo V, follis, Sicily; Constantine V, follis, Sicily; Nicephorus I, follis, Sicily; Michael II and Theophilus, folles (2); Theophilus, follis; Leo VI, follis; Basil I, follis; Romanus IV, follis; Anonymous A1, follis; John II, tetartera (2).
Good fine to good very fine, a few better (23 pieces) 600.-
- 332 Bronze coins (11): Anonymous follis, Class f; Manuel I Æ; Isaac II Æ; Latin tracheae (4); Bulgarian imitations (4).
Mostly good very fine (11 pieces) 250.-

The coinage of North Africa and Sardinia from the arrival of the Vandals in 429 to the conquest of Carthage by the Arabs in 695

Gaiseric, 428-477

- 333 Siliqua, in the name of Honorius, Carthage, c. 439-477/480, AR 1.51 g. [DN] HONORI-VS PF AVG. Draped and cuirassed bust r., wearing pearl diadem. Rev. VRBS ROMA Roma, helmeted and draped, seated l. on cuirass, holding Victory on globe with her r. hand and resting l. on downward-pointing spear; in exergue, RVPS. BMCV 6-9. MEC 1-3. Morrisson/Schwartz 54 var. Dark patina. Very fine 225.-

Gaiseric invaded Africa, ostensibly in support of the revolt of Count Boniface, in 429 and rapidly overran much of Roman North Africa, culminating in his capture of Carthage in 439. He issued no coinage in his own name but a specific series of siliquae and half-siliquae which copy official issues of Honorius have long been ascribed to him. These pieces are normally found in Tunisia, are struck on flans too small for the dies, and usually appear with the die axis 90° or 270° rather than the usual Roman 180° or 360°. The coins only began to be issued after the capture of Carthage and may well have continued on into the reign of Gaiseric's son Huneric, 477-484. Named issues of the Vandals only appeared under Gunthamund, 484-496 (see below, nos. 337-348).

- 334 Half-siliqua, in the name of Honorius, Carthage c. 439-477/480, AR 0.79 g. DN HONOR-I-[VS] PF AVG Draped and cuirassed bust r., wearing pearl diadem. Rev. VICTOR-[I]A AVGG Victory standing l., holding wreath and palm branch; in exergue, RV. BMCV-. MEC 4-5 var. Morrisson/Schwartz 131 (this coin). Dark patina, a particularly nice example. Very fine 225.-
- 335 Siliqua and half-siliqua, in the name of Honorius, Carthage c. 439-477/480, AR 1.35 and 0.78 g. Types as last. Morrisson/Schwartz 17-20 var. (siliqua), 111 var. (half-siliqua). Dark patina. Fine (2 pieces) 150.-
- 336 Siliqua and half-siliqua, in the name of Honorius, Carthage, c. 439-477/480, AR 1.54 and 0.76 g. A lot similar to the last. Morrisson/Schwartz 42 var. (siliqua), 114 (half-siliqua, this coin). Dark patina. Fine (2 pieces). 150.-

Gunthamund, 484-496

- 337 100-denarii, Carthage, AR 2.08 g. DN REX GVN-THAMVNDV Draped and cuirassed bust r., wearing pearl diadem. Rev. D.N, above, abbreviation mark, below, C with long top; all within laurel wreath. BMCV 1-2. MEC 6-7. MIB 2. Very rare. Good very fine and bold. 800.-
- 338 50-denarii, Carthage, AR 1.10 g. DN RX G-VNTHA Draped and cuirassed bust r., wearing pearl diadem. Rev. D.N, above, abbreviation mark; all within laurel wreath. Arslan 1. BMCV 3-7. MEC 8. MIB 3. Good very fine and clear. 375.-
- 339 50-denarii, Carthage, AR 0.91 g. Similar to the last, but of slightly more delicate style. Dark patina. Edge slightly chipped, otherwise good very fine 250.-
- 340 25-denarii, Carthage, AR 0.49 g. DN RX G-VNTHA Draped and cuirassed bust r., wearing pearl diadem. Rev. DN/XXV, above, abbreviation mark; all within laurel wreath. BMCV 8. MEC 11-12. MIB 4. About very fine 150.-
- 341 25-denarii, Carthage, AR 0.47 g. Similar to the last, but on reverse, D.N/VXX. BMCV-. MEC-. MIB-. A very interesting, and possibly unpublished, variant with this unusual reverse error. About very fine 175.-

Thrasamund, 496-523

- 342 50-denarii, Carthage, first issue, AR 0.79 g. DN RG THR-ASAMVDS Draped and cuirassed bust r., wearing pearl diadem. Rev. D.N, above, abbreviation mark; all within laurel wreath. BMCV 11. MEC 15. MIB 5b. Good very fine 250.-

- 343 50-denarii, Carthage, second issue, AR 0.90 g. DN RG TR-SAMVNDs Draped and cuirassed bust r., wearing pearl diadem. Rev. D.N/L, above, abbreviation mark; all within laurel wreath. Arslan 9. BMCV 12. MEC 17-18 var. MIB 6a. Attractive dark toning. A bold and clear example. Good very fine 300.-

- 344 50-denarii, Carthage, second issue, AR 0.88 g. Similar to the last but obverse inscription reads DN RG THRA-SAMVNDs (the letters HRA in ligature). Arslan 9 var. BMCV 13 var. MEC 17-18 var. MIB 6a. Good very fine 250.-

Hilderic, 523-530

- 345 50-denarii, Carthage, AR 1.18 g. D]N HILDI-RIX REX draped and cuirassed bust r., wearing pearl diadem. Rev. FELIX-KARTG Carthage standing, facing, wearing long robes and wreath, holding corn ears in each hand. Arslan 18-19. BMCV 3-7. MEC 21 22. MIB 8. Minor edge chip, otherwise exceptionally nice and extremely fine 250.-

The Semi-Autonomous Coinage of Carthage, ca. 523-533

- 346 4-nummi, Carthage, AE 0.96 g. Diademed, draped and cuirassed bust l.; to l., palm branch. Rev. N/III. Arslan 23-24. BMCV 12-14. MEC 51-56. MIB 20. An exceptionally fine example. Extremely fine 300.-

Gelimer, 530-534

- 347 50-denarii, Carthage, 530-December 533, AR 1.23 g. DN REX G EILAMIR Draped and cuirassed bust r., wearing pearl diadem. Rev. DN/L, above, cross; all within laurel wreath. Arslan 29-30. BMCV 1-3. MEC 26. MIB 12. Rare. Attractively toned. Good very fine 600.-

- 348 12-denarii, Carthage, 530-December 533, AR 0.20 g. Illegible inscription. Diademed head (bust?) r. Rev. X.II within laurel wreath. Unpublished and apparently unique. Extremely crude. Very fine 1,200.-

This extraordinary coin can safely be ascribed to Gelimer, the last Vandal king of Africa, through its fragmentary obverse inscription (one can possibly read ..GE.. in the left field) and by the arrangement and prominence of the numerals on the reverse. These last can be paralleled by 25-denarii pieces of Gelimer, as MEC 27 and MIB 1, 11 (there ascribed to Hilderic but later corrected to Gelimer by use of a better preserved specimen, MIB 3 pl. 40, N12), and by the 50-denarii piece above.

Justinian I, 527-565

- 349 Solidus, Carthage, 546/7, AV 4.46 g. DN IVSTINI-ANVS PPAVC Diademed, helmeted and cuirassed bust facing, holding globus cruciger in raised r. hand and with shield over l. shoulder. Rev. VICTOR-AAVCCC I Victory standing facing, holding long cross in r. hand and globus cruciger in l.; in field to r., star, and in exergue, CONOB. DOC 277e. MIB 25. Morrisson(1988) 38 (this coin). S 250. Scarce and extremely fine 900.-

- 350 Solidus, Carthage, 546/7, AV 4.47 g. As last, and struck from the same reverse die. DOC 277e. MIB 25. Morrisson (1988) 44 (this obverse die). S 250. Scarce. Obverse struck slightly flat, about extremely fine 750.-

Ex Credit Suisse Berne sale 5, 1986, 617

- 351 Solidus, Carthage, 547/8, AV 4.44 g. Similar to the last, but obverse of different and more accomplished style; reverse legend ends, AVCCC IA. DOC 277a. MIB 25. Morrisson(1988) 79 (this obverse die). S 250. Rare. Reverse scratched, otherwise nearly extremely fine 750.-

- 352 Half-siliqua, Carthage, c. 533-537, AR 1.29 g. DN IVSTINI-ANVS PPAVC Draped and cuirassed bust r., with pearl diadem. Rev. VOT/MVLT/HTI within wreath; in exergue, CONOS. DOC 280. MIB 51. S 253. - 356 Half-siliquae (3), Carthage, c. 533-537, AR 1.20, 1.11, 0.96 g. Similar to the above. Fine or better (3 pieces) . 300.-
- 357 Quarter-siliqua, Carthage, c. 533-537, AR 0.62 g. DN IVSTINI-ANVS PPAVC Draped and cuirassed bust r., with pearl diadem. Rev. V O/M-T in the quarters of a cross, all within wreath; in exergue, CONOS. DOC 282. MIB 52. S 256. Scarce. Good fine 100.-
- 358 Quarter-siliqua, Carthage, c. 533-537, AR 0.52 g. Similar to the last, but reverse legend is V-O/T-M. DOC 282 var. MIB 52. S 256. Scarce. Good fine 125.-
- 359 Quarter-siliqua, Carthage, c. 533-537, AR 0.51 g. Similar to the last, but reverse legend is O-V/T-M. DOC 282 var. MIB 52 var. S 256 var. This curious reverse legend variant seems to be unpublished. Very fine 225.-
- 360 Quarter-siliqua, Carthage, c. 533-537 (or later ?), AR 0.53 g. No visible inscription. Draped and cuirassed bust r., with pearl diadem. Rev. Cruciform monogram of the name of Justinian. Unpublished and unique. An extremely exciting and interesting coin. Crude. Very fine 1,000.-

This extraordinary piece has been ascribed to Justinian for a number of reasons. The obverse die is much too big for the coin and it is, in fact, very close to the obverse die used on the half-siliqua in no. 355 above. Profile heads struck later in Justinian's reign, and in that of Justin II, appear quite different in style. The reverse monogram seems nearly exactly the same as that used on 5-nummi pieces of Justinian from Antioch (as DOC 272 and MIB 163) and, as such, is quite different from similar monograms used by Justin II (in his sole name at Antioch and Carthage, as MIB 64, 66 and 82). The square monograms used by Justin II which bear the name of his wife Sophia as well (as MIB 45 and DOC 60 passim) are utterly unlike that on this small silver piece. The only problem with this identification is the strange form of the lower part of the monogram: the bottom letter is clearly an A but above it is what resembles a cursive omega, though an unfortunately located die break makes this whole area somewhat unclear.

- 361 Half-siliqua, Carthage, c. 537-552, AR 1.20 g. DN IVSTINI-ANVS PPAV Draped and cuirassed bust r., with pearl diadem. Rev. Justinianic monogram with cross above; all within wreath. DOC-. MIB 53. S 254. Rare. Good very fine 450.-

Very rare. Some weakness on margin, otherwise brilliant extremely fine 1,800.-

Ex Credit Suisse Berne sale 5, 1986, 640.

These solidi illustrate perfectly the confusion which arose from the use of two parallel systems for dating in Byzantine times: the indiction and regnal dates. Here the die engraver used the regnal date 8 (including Tiberius' Caesarship under Justin II as part of his reign) on the obverse and added the indictional date 15 on the reverse for good measure! It should be noted that there is a pellet on the obverse above the N of AN, presumably an abbreviation mark of some kind.

- 374 Half siliqua, Carthage, AR 0.89 g. DN TIB CO-NSTAN PPA Diademed, helmeted and cuirassed bust facing, shield over l. shoulder. Rev. Cross potent dividing legend LV-X M/VNDI; all within wreath. DOC 59. MIB 20. S 464.

Very rare and perhaps unknown with this obverse legend. Some weakness, otherwise virtually as struck. 2,800.-

Ex Sternberg sale 12, 1982, lot 914

This is an especially interesting coin and is very probably the first issue of Phocas struck in Carthage. We know this because the die engraver made a mistake at the end of the legend. Under Maurice Tiberius the obverse legends first ended PP AV AN followed by the indiction year then, in his last issues, simply PPAN, again followed by the year. Under Phocas the normal ending was PERPAN, as on the following lot from the same year. Our coin, however, ends PERPAVN showing that the engraver was unsure of what the proper formula was to be. He also realized that his intended legend, PERPAVN, simply would not fit on the coin.

- 389 Solidus, Carthage, 602/3, AV 4.45 g. DN FOCA-C PERPAN S Crowned bust facing, wearing consular robes and holding mappa in r. hand and cross in l. Rev. The inscription on the reverse of this coin can be restored as VICTORIA, read vertically and horizontally with the upright of the R twice used as I.

The Revolt of the Heraclii, 608-610

- 394 Solidus, Carthage (?), 608/9, AV 4.37 g. DMN HERACAI CON[SVAI I]B Bare-headed facing busts of Heraclius, beardless, l., and his father the Exarch Heraclius, bearded, r., both wearing consular robes. Between them, cross. Rev. VICTORIA-CONS B IB Cross potent on three steps; in exergue, CONOB. BMC 337. DOC 13 (Alexandria). MIB 2 (Alexandria, but reattributed to Carthage in MIB 3, p. 75). S 720 (Alexandria). Overstruck on a solidus of Maurice Tiberius from Carthage with the indictional date 15 (596/7) as DOC 229.

Extremely rare and of great historical and numismatic importance. Considerable traces of overstriking, otherwise very fine 5,000.-

Illustrated on colour plate 3.

This coin poses a number of problems in mint attribution, not only for itself but also for subsequent issues of Heraclius, themselves ascribed to the mint of Carthage (see, below, nos. 398, 399 and 401). The DOC distributed the gold of the Heraclii between the mints of Carthage and Alexandria (following P. Grierson, "The Consular Coinage of 'Heraclius' and the Revolt against Phocas of 608-610," NC 1950, pp. 71-93). The first series is of the characteristic Carthaginian thick fabric, uses the equally characteristic lambda form of L, and bears the indictional dates 11-13 (DOC 1-3, MIB 1, S 710). The second group, ascribed to Alexandria, is more varied. Its first series is composed of coins having rather rough, stylistically peculiar obverses paired with reverse dies bearing the inscription VICTORIAAVCC and the officina letter gamma (DOC 10, MIB 4, S 718). A second series utilizes the same obverse but paired with

a reverse reading VICTORIA CONSAB and ending with the indictional date IA, II= 608 (DOC 11, MIB 3, S 719). The final series of this second group retains the same basic reverse type as the second series (including indictional dates 11-13) but utilizes a new, finer style obverse which has clear Carthaginian parallels: a beardless bust for the younger Heraclius and the use of lambda for L (DOC 12-14, MIB 2 and S 720). The explanation for the use of the VICTORIA AVCC reverse on the first series from Alexandria is that old reverse dies were paired with newly cut obverses. These initial issues were then replaced by ones which bore the correct reverses referring to the consular status of the revolt's leaders. Finally, the rough style obverses were replaced by others cut by a more experienced die-cutter sent out from Carthage, thus explaining the change in style and the Carthaginian elements of design.

Hahn, in MIB 2, changed some of these attributions. The first group remained with Carthage (MIB 1), but the second group was divided in two: the first and second series were given to a mint on Cyprus (MIB 3-4: their order was inverted with AVCCΓ being seen as an issue of year 3) and the last continued as Alexandrian (MIB 2). Hahn clearly accepted the idea that his Alexandrian issues were made by workers imported from Carthage; and he was also convinced they were struck in Alexandria because specimens of this type had been found in Egypt.

However, the situation changed in the interval between the publication of MIB 2 in 1975 and MIB 3 in 1981. It appeared that a considerable group of gold coins of Heraclius were of undoubted Carthaginian style but were of surprisingly large module (MIB 3 91-93, all solidi). They also bore dates which indicated that they were struck in parallel, rather than preceding or following, the relatively larger numbers of normal, small-sized solidi of Heraclius (MIB 83-90). He suggested that this parallel series was, in fact, produced in Carthage, but for use in the West (Sardinia ?) where the small-sized coins popular in Carthage were, perhaps, disliked or unfamiliar. Needless to say it might also be possible that the entire series of larger module issues of Heraclius were not struck at Carthage at all, but rather at a separate or branch mint somewhere else in North Africa or on Sardinia. In any event, the earliest of these larger module issues of Heraclius (MIB 3, 91-92 and nos 398-399 and 401 below) share exactly the same fabric as our solidus of the revolt of the Heraclii which, as we have seen, had previously been well-nigh universally ascribed to Alexandria. Thus, on MIB 3 p. 75, the revolt solidus (DOC 13, MIB 2) was reattributed to the mint of Carthage and viewed as the earliest of that mint's special issues for the West. The fact that our solidus is overstruck on a Carthage issue of Maurice, as is a solidus of Heraclius of the same fabric (no. 401 below), certainly strongly supports the attribution of these coins to the mint of Carthage.

Just to complicate the situation slightly further one can suggest yet another reconstruction given the same evidence. Using the material presented in MIB 2 and 3, as well as the Heraclius solidus of indiction 4 which appears below as no. 401, it is clear that these large flan solidi of Carthaginian style began in 607/8 and continued without a break until 615/16. No coin is known for indiction 5 in 616/17, but there is one recorded for 617/18. However, the next example of the larger module type dates to 621/22 (indiction 10) and is rather smaller in module and different in style. There are other solidi of this slightly smaller module for the years 622/23-627/28 and 630/31 (in comparison, the normal small-sized solidi of Heraclius from Carthage form a virtually complete series, only lacking years 629/30 and 635/36). Now, this clear change in fabric between the larger module issues of 617/18 and those of 621/22 could be explained by a simple lack of evidence: if coins of the intervening years turn up we might be able to see a gradual diminution of size and change in style. However, this three year gap could also be explained by a complete break in the coinage due to the Persian conquest of Alexandria in 618. Thus, we can return to the old attribution of this group of revolt solidi to Alexandria, being made by workers sent from Carthage, and overstruck on older solidi from Carthage which were possibly even brought from there as part of the revolt's finances. Solidi of this style would then be struck in Alexandria until just prior to the Persian take-over when the mint workers would be hastily withdrawn back to Carthage, where they would continue to make coins of the larger module variety for a number of years thereafter. This would be a neat solution, though it would, of course, leave scholars with the problem of where to place a number of other gold issues of Heraclius which are now tentatively ascribed to Alexandria.

Extremely rare and possibly unique. Considerable clear traces of overstriking. Struck from a worn obverse die.
About very fine 1,800.-

This coin is dated to the year 615/16, i.e. year 4 of the indiction series beginning in 612 and ending in 627. While the delta which ends the reverse legend has close affinities to the alphas, and could be mistaken as one, the delta on the obverse (of which only the lefthand side is fully visible owing to interference from the undertype) is clearly different from the alpha in the name of Heraclius Constantine. The obverse style is completely different from any other known example of year 1 (as MIB 92a.1) and is very similar to one of year 3 (MIB 92a.3). Additionally, the cross potent on the reverse is on two short steps rather than on two very long ones (year 1) or three very long ones (years 2 and 3, MIB 92a.2-3). In fact, the reverse is nearly exactly the same as an example of year 6 (MIB 92a.4) and must have been made at roughly the same time.

This *novum* has to be placed early in the reign of Heraclius because of its parallels with third-siliquae of the same period. This is

especially valid because it has been noted (P.J. Donald, "An Inter-Denominational Die-Link at Heraclian Carthage", NCirc July 1987, pp. 184-185) that the two normal silver denominations could share the same obverse dies. In this case, the obverse shows a bust (most of the lower part is missing because of the small size of the flan) which is holding a globus cruciger (the cross is quite clear) and a mappa (partly visible on the far l. at the bust's neck level). This is exactly the same arrangement as on the obverse die of the previous lot (see the illustration of MIB 147 for a clear example). Thus, our sixth-siliqua is firmly anchored chronologically at the beginning of Heraclius' reign. While anepigraphic, the cross potent reverse type is the same as that on the third-siliquae of the second series of Heraclius (MIB 148 and the following lot) which continued to be issued until 617 when the types were again changed. At this point the obverse bust changes to one with neither globus cruciger nor mappa, thereby excluding any possibility of our coin being struck so late.

Long cross on two steps between crowned, draped and facing busts of Heraclius and Tiberius; below steps, T. DOC 42.3 (these dies). MIB 19 (these dies, = DOC 42.3). S 1187A.
A rare variant. Of crude style but extremely fine 900.-
Ex Sternberg sale 12, 1982, 930.
- 428 Solidus of small module, Carthage, c. 675, AV 4.35 g. ...NVS Helmeted, diademed and cuirassed bust three-quarter facing, holding spear in r. hand and with shield over l. shoulder. Rev. Cross potent on three steps; to l. and r., Heraclius and Tiberius standing facing, both crowned and draped and each holding globus cruciger; in exergue, COB. DOC 43a var. MIB 20. S 1188.
Edge cut, otherwise extremely fine 575.-

- 429 Solidus of small module, Carthage, 679/80, AV 4.32 g. DON... Helmeted and cuirassed bust three-quarter facing, holding spear in r. hand and with shield over l. shoulder. Rev. Cross potent on three steps; to l. and r., Heraclius and Tiberius standing facing, both crowned and draped and each holding globus cruciger; in field to l. and r. of cross, H - S (retrograde); in exergue, CONOB. DOC-. MIB 25 (Sardinia). S 1189A.

Very rare. Good extremely fine 1,400.-

The retrograde S on the reverse of this solidus may have something to do with Sardinia since just such a letter was later to be used as a mintmark for coins struck on that island (as on solidi of Justinian II's first reign, MIB 19-20). However, since these solidi tend to turn up in Tunisia rather than on Sardinia, they are best seen as having been minted in Carthage (perhaps utilizing precious metal sent from Sardinia as taxes). See C. Morisson, *Un trésor de solidi de Constantin IV de Carthage*, RN 1980.

- 430 Solidus of small module, Carthage, 679/80, AV 4.29 g. As last, but struck on a much fuller flan. Morrison RN 1980, 23/5 (this coin)

Very rare. Some roughness, otherwise extremely fine 1,400.-

Ex Siernberg sale 12, 1982, 932.

- 431 Solidus of small module, Carthage, 680/81, AV 4.42 g. Garbled inscription. Helmeted and cuirassed bust three-quarter facing, holding spear in r. hand and with shield over l. shoulder. Rev. Similar to the last, but to l. of cross, small cross and to r., theta; in exergue, ONB. DOC 46b. MIB 22. S 1189.

Apparently overstruck on an earlier issue. Traces of mounting, very fine 475.-

- 432 Solidus of small module, Carthage, 680/81, AV 4.40 g. Another example as last, but truck on a much smaller flan.

Weakly struck, good very fine 600.-

- 433 Solidus of small module, Carthage, 680/81, AV 4.46 g. DN CO-A-NVS P Helmeted and cuirassed bust three-quarter facing, holding spear in r. hand and with shield over l. shoulder. Rev. ACTORI-AVVP θ Cross potent on three steps; to r., theta, below, pellet and, in exergue, CNOIB. DOC 48. MIB 27. S 1190 (this coin in note).

A very rare type. Of exceptionally accomplished style for the issue, extremely fine or better 1,400.-

Illustrated on colour plate 3. Ex Vecchi-Bonham sale 3, 1980, 203.

- 434 Third-siliqua, Carthage, 677-681, AR 0.49 g. Helmeted and cuirassed bust three-quarter facing, holding spear in r. hand and with shield over l. shoulder. Rev. Crowned and draped busts of Heraclius and Tiberius facing, each holding globus cruciger. DOC 50. MIB 70. S 1193.

Very rare. Attractive dark toning. Extremely fine 850.-

Justinian II, First Reign, 685-695

- 435 Solidus of small module, Carthage, late 695, AV 4.30 g. IVSTIOI-ATOC PP Crowned and draped bust facing, holding globus cruciger in r. hand. Rev. CICTORI-A... (with the last letter being highly uncertain) Cross potent on three steps; to r., I and, in exergue, CONB. DOC-. MIB-. Cf. S 1265 B.

Unpublished and probably unique. Extremely fine 2,500.-

This is an almost inexplicable coin. In size and neatness of execution it is paralleled solely by Justinian II's earliest issues from Carthage, as MIB 17. However, the I in the reverse field can only be interpreted as a regnal year, similar to the I which appears at the end of the obverse legend on MIB 18b. Yet MIB 18a and 18b are of a quite radically different style from this piece. If this is the case, and the few known solidi of Justinian II from Carthage now seem clearly to fall into two distinctly different groups by style, we may have to rethink where the coins now attributed to Carthage were struck. The situation in North Africa during the last years of Byzantine rule must have been extremely ominous: Carthage was taken by the Arabs in late 695 and the last Byzantine outpost, Septem (Ceuta), fell in 709. We know that the Carthaginian mint, or at least some of its workers, was transferred to Sardinia in the face of the Arab threat and was unquestionably operating there well before Justinian II's overthrow at the end of 695 (see below, nos. 437 and 438). Can we postulate that another group of workers from the mint at Carthage were transferred elsewhere in North Africa for safety at roughly the same time? Might there have been "branch mints" not only in Sardinia but at Ceuta as well? If so, one might suggest that MIB 17 and this new piece were struck at Carthage, while MIB 18 should be placed elsewhere. In any event, this coin probably has the distinction of being the last Byzantine gold coin to have been struck in Africa.

- 436 Third-siliqua, Carthage, c. 690, AR 0.51 g. IU...NUS PP Crowned and draped bust facing, holding globus cruciger. Rev. Chrysmon on globe; to r., star. DOC-. MIB 41 (this coin = N. Fairhead, "A New Silver Coin of Justinian II of Carthage", NC 1979, pp 210-211 and pl. 30 A). S 1265 C (this coin).

Unique. Clear traces of overstriking, otherwise very fine 2,000.-

This coin is overstruck on an earlier silver piece of Carthage bearing a wreath on its reverse which is clearly visible on the present reverse. One might suggest an issue of Phocas (as MIB 56-57 and nos. 391-393 above). It should be noted that the drawing of this coin in MIB is incorrect since it restores the reverse of the coin with the wreath of the undertype.

- 437 Solidus of reduced module, Sardinia, c. 692-695, AV 4.42 g. IUS CRISTI R-EX REGN (S's retrograde) Facing bust of Christ, draped and with long hair and full beard, raising r. hand in benediction and holding book of Gospels with l.; behind head, cross. Rev. [...]SER CRI (S retrograde) Emperor standing facing, crowned, wearing long robes, and holding akakia in l. hand and cross potent on two steps in r.; below r. arm, retrograde S. DOC 37. MIB 20/2 (this coin, also see note p. 167-8). S 1277.

Of the greatest rarity. An exceptional and important coin. Extremely fine 7,500.-

Illustrated on colour plate 4. Ex Sternberg sale 11, 1981, 1008.

- 438 Half-follis of 20-nummi, Sardinia, c. 688-c.692, AE 3.81 g. dN UCTI...ANUS PPA Crowned, draped and beardless bust facing, holding globus cruciger in r. hand. Rev. K; to l., r. and above, cross; below, PAX. DOC 39. MIB 63. S 1279.

Overstruck on another example of the same (?) variety. Exceptionally well preserved for this rare type.

Good very fine 400.-

The Germanic and Byzantine coinages in Italy and Sicily from Ricimer to Basil I

Ricimer, Magister Militum and Patrician, 456-472

- 439 AE 4, Rome, 465-467, Copper, 2.17 g. Garbled inscription. Diademed, draped and cuirassed bust r., of rude style. Rev. Monogram of the letters R-C-M-E within wreath (when the R is used twice and the vertical strokes of the R and the E are read as I's, the full name RICIMER is present). DOC 900 var. G. Lacam, „Le monnayage de Ricimer," *Studia Numismatica Labacensia* Alexandro Jelocnik Oblata (Ljubljana 1988), pp. 219-246, Pl. 5, Type 2 (this coin).

Extremely rare, the best preserved heavy-weight example known. About fine 2,500.-

Ex *Leu/Numismatic Fine Arts* sale 1984, Garrett II, 376 and Ratto, Lugano, 9 December 1930, 2353 sales.

This extraordinary coin is one of the only definite memorials of the powerful general Ricimer, of Suevo-Visigothic descent, who virtually ruled the West from the time of his appointment as Magister Militum by Avitus in 456 to his death in 472. His history has been commented on *in extenso* by Lacam and need not detain us here. It is important to note that this is the first and only time a truly Imperial coin bore the name, albeit in monogram form, of one of the barbarian generals who later came to rule the West (issues of the Ostrogoths and other groups who issued coins bearing the names of the titular emperors in the West or East were striking primarily under their own authority).

Theoderic, 493-526

- 440 Tremissis, Rome, before 518, AV 1.48 g. DN ANASTA-SIVS PF AVG Diademed, draped and cuirassed bust r. Rev. VICTORIA AVGVSTORVM Victory walking r., head turned to l., holding wreath in r. hand and globus cruciger in l.; to r., star, and, in exergue, CONOB. Arslan 13. Kent (1971) 11. Kraus 13 ff. MEC 114-115. MIB 10. Ravenna 301.

A particularly well struck example. Extremely fine 1,000.-

- 441 Half-siliqua, Rome, before 518, AR 1.10 g. DN ANASTA-SIVS AVG Diademed and cuirassed bust r. Rev. Six-pointed star within wreath. Arslan 27. Kent (1971) 22. Kraus 35. MEC 117. MIB 37. Ravenna 302.

Dark patina. Minor edge damage. Very fine 200.-

With the exception of a single magnificent medallion, Theoderic's full name never appeared on the coinage. His issues were all in the names of either Anastasius I or Justin I, though some of them might discretely (on the gold) or more overtly (on the silver, see the next lot) bear his monogram.

- 442 Quarter-siliqua, Rome, before 518, AR 0.68 g. [DN ANASTA]-SIVS AVC Diademed and cuirassed bust r. Rev. Monogram of Theoderic with cross above; all within wreath. Arslan 28. Kent (1971) 23. Kraus 38. MEC 118. MIB 39b. Ravenna 303.

Dark patina. Edge slightly ragged, otherwise good very fine 225.-

- 443 Quarter-siliqua, Milan, before 518, AR 0.66 g. DN ANAST-SIVS PPC (retrograde and read outwards) Diademed and cuirassed bust r. of crude style; below, .N. (retrograde). Rev. ...VICTA ROM... Monogram of Theoderic with cross above and star below. Arslan 32ff var. Kent(1971) 18 var. Kraus 62 var. MEC 120 var. MIB 44b. Ravenna 307 var. Of crude but vigorous style. Extremely fine 450.-

A number of silver issues of Theoderic and Athalaric (see below, no.449) exhibit a remarkably barbarous style somewhat akin to issues given to Sirmium, though of a much smaller module and thicker fabric. In any event, Milanese issues of this type are very much rarer than normal issues, and the possibility that they may turn out to have been contemporary imitations cannot be excluded.

- 444 Solidus, Rome, 518-526, AV 4.42 g. DN IVSTI-NVS PPAVC Diademed, helmeted and cuirassed bust three-quarter facing, holding spear in r. hand and with shield over l. shoulder. Rev. VICTORI-A AVCCCA Victory standing l., holding long jewelled and voided cross; to l., star, and, in exergue, COMOB. Arslan 36. Kent(1971) 7. MEC-. MIB 24. Ravenna 304. Very rare. A particularly splendid example. Good extremely fine 2,500.-

Illustrated on colour plate 4.

Almost all the Ostrogothic issues in the name of Justin I can probably be ascribed to Theoderic. While there is a chance that some gold coins may have been struck by Athalaric during the short period between the deaths of Theoderic and Justin I, there is not now any secure way of identifying them.

- 445 Tremissis, Rome, 518-526, AV 1.47 g. DN IVSTI-NVS PF AVC Diademed, draped and cuirassed bust r. Rev. VICTORIA AVGVSTORVM Victory advancing three-quarter r., head to l., holding wreath in r. hand and globus cruciger in l.; to r., star; and in exergue, COMOB. Arslan 37. Kent(1971) 12. MEC-. MIB 25. Very fine 400.-

Athalaric, 526-534

- 446 Solidus, Rome, 527-534 (or later), AV 4.44 g. DN IVSTINI-ANVS PF AVC Diademed, helmeted and cuirassed bust three-quarter facing, holding spear in r. hand and with shield over l. shoulder. Rev. VICTORI-A AVCCCA Victory standing l., holding long, jewelled and voided cross; to l., star, and in exergue, COMOB. Arslan 103-105. MEC 122. MIB 28. Ravenna 323. A most attractive example. Extremely fine 1,600.-

- 447 Solidus, Rome, 527-534 (or later), AV 4.45 g. DN IVSTINI-ANVS PF AVC Similar to previous, but of another style. Rev. VICTORI-A AVCCCA: Similar to previous, but legend ends with :. Arslan 103-105. MEC 122. MIB 28. Ravenna 323. Some die rusting and light scratches. Struck on a broad flan. Toned and nearly extremely fine 1,300.-

- 448 Tremissis, Rome, 527-534 (or later), AV 1.49 g. DN IVSTINI-ANVS PF AVC Diademed, draped and cuirassed bust r. Rev. VICTORIAAVCVSTORVM Victory walking r., head turned to l., holding wreath in r. hand and globus cruciger in l.; to r., star, and in exergue, COMOB. Arslan 106-108. MEC 123. MIB 29a. Ravenna 324. An attractive example. Nearly extremely fine 750.-

Ex Leu/Numismatic Fine Arts sale 1984, Garrett II, 504.

- 449 Half-siliqua, Milan(?), 527-534, AR 1.07 g. DN IVSTINIA-NVS PPAV Diademed, draped and cuirassed bust r., of crude style. Rev. Monogram of Athalaric with cross above, all within wreath. Arslan-, MEC-, MIB-, Ravenna-. Apparently unpublished and extremely rare. Nearly extremely fine 650.-

The only parallels we have for this coin are equally crude issues in the name of Theoderic which have also been ascribed to Milan (see above, no. 443). There are notable differences in style between these coins and the more standard silver issues of Athalaric (see the following three lots).

- 450 Quarter-siliqua, Rome, 527-534, AR 0.69 g. DN IVSTI-NIANAVC Diademed and cuirassed bust r. Rev. DN/ATHAL/ARICVS/REX within wreath. Arslan 114-115. MEC 131. MIB 54.1. Ravenna 326. A rare variety. Very fine 250.-
- 451 Quarter-siliqua, Rome, 527-534, AR 0.72 g. As last but, on reverse, last line ends RIX. Arslan 116-122. MEC 127-130. MIB 54.2. Ravenna-. Nicely toned. Good very fine 375.-

- 452 Quarter-siliqua, Rome, 527-534, AR 0.71 g. Another example as last. Nicely toned. Good very fine 375.-
- 453 Quarter-follis or decanummium, Rome, 526-534, AE 2.49 g. INVIC-TA ROMA Helmeted and draped bust of Roma to r. Rev. DN ATHAL-ARICVS Athalaric or warrior standing r. in military dress, holding long spear with r. hand and resting l. on shield; to l. and r., S-C, and in field l., X (= 10). Arslan 123ff. MEC 132. MIB 77. Ravenna 328.
Uncleaned with a green patina. Very fine 250.-
- 454 Quarter-follis or Decanummium, Ravenna, 526-534, AE 3.41 g. INVIC-TA ROMA Helmeted and draped bust of Roma r. Rev. DN/ATHAL/ ARICVS/REX within wreath. Arslan 135 ff. MEC 133 134. MIB 78. Ravenna 327.
Uncleaned with a green patina. About very fine/good very fine 200.-
- 455 Eighth-follis or pentanummium, Ravenna, 526-534, AE 1.56 g. INVIC-TA ROMA Helmeted and draped bust of Roma r. Rev. -DN ATHALARICVS RIX around large V (= 5); above, cross. Arslan 145. MIB 79. Ravenna 329.
Attractive olive-green patina. Good very fine 375.-

For the distinction between the Ravenna and Rome pentanummia, see MEC pp. 37-38 (the Rome issues lack either REX or RIX on the reverse). It is worth noting that while a considerable number of these pieces has been found in excavations at Ravenna, none of the type attributed to Rome was among them.

- 456 Eighth-follis or pentanummium (?), Ravenna, 526-534 (or later ?), AE 1.71 g. INVICT-A ROMA Helmeted and draped bust of Roma r. Rev. Monogram of Ravenna within wreath. Arslan-. Kraus 7. MEC-, MIB 72c (=Kraus 7, and wrongly attributed to Rome). Ravenna-.
An extremely rare type. Green patina. Very fine 250.-

This coin is quite an unusual piece. The MIB viewed it as simply a mule between two decanummium types, but this is obviously not the case since the flan is so much smaller and lighter. Its exact chronological position within the whole of Athalaric's coinage is uncertain (if, in fact, it was struck during his reign).

Non-Regal Bronze Issues from the Period of Theoderic and Athalaric

Countermarked Issues

- 457 Double-follis of 83-Nummi. A sestertius of Galba, RIC 394, 24.84 g., countermarked on the obverse, in the field before the emperor's portrait, with LXXXIII. MEC 65 (for the denomination). MIB 13 (Vandals, for the denomination). Morrisson(1983) 1-2 (for the denomination).

The 83-nummi denomination is extremely rare. Host coin nearly very fine and with an attractive, uncleaned green patina. 2000.-

These countermarked issues have long been considered issues as made in Vandalic North Africa but the evidence of the latest studies makes it seem overwhelmingly likely that they were, in fact, made in Italy, and were in use there during the first quarter or first half of the 6th century (if not slightly earlier). The MEC explains the function of these coins as being thirds (83-nummi) and sixths (42-nummi) of the siliqua, rather than being mere multiples of the nummus. This is paralleled by the issuing of both 120 and 125 nummi pieces in silver under Justinian in Italy (one being the multiple of 3-folles, the other being a half-siliqua).

- 458 Follis of 42-nummi. A sestertius of Maximinus I, RIC 78, 19.49 g., countermarked on the obverse, in the field before the emperor's portrait, with XXXII (by mistake for XLII). For a similar mistake in countermarking, see Morrisson (1983) 21, a mistakenly countermarked sestertius of Severus Alexander. Good fine 500.-
- 459 Follis of 42-nummi. An as of Tiberius Caesar, cf RIC 469, 8.14 g., countermarked on the obverse, in the field before the prince's portrait, XLII. For the denomination: MEC 66-91. MIB 14 (Vandals). Morrisson(1983), 3-28.
Host coin, poor 200.-
- 460 Follis of 42-nummi. Similar to the last, an as of Vitellius, RIC 163, 11.13 g., countermarked on the obverse, in the field before the emperor's portrait, with XLII. Host coin, very good 350.-

- 461 Follis of 42-nummi. Similar to the last, an as of Vespasian, 9.55 g., countermarked with XLII on the obverse, in the field before the emperor's portrait. Host coin, poor 200.-
- 462 Follis of 42-nummi. Similar to the last, an as of Vespasian, total weight 10.78 g., countermarked on the obverse, in the field before the emperor's portrait, with XLII. Apparently found in a hoard with nummi since a nummus and two fragments of nummi are still adhering to the reverse of the piece.
An extraordinary object. Host coin, poor 300.-
- 463 Follis of 42-nummi. Similar to the last, an as of Galba, RIC 511, 9.64 g., countermarked with XLII on the obverse, in the field before the emperor's portrait, and on the reverse, in the field to l. For other examples of coins mistakenly countermarked on the reverse as well as the obverse, see Morrisson (1983), 11-12. An unusual variant.
Host coin, good 350.-

Senatorial Issues

- 464 Half-follis of 20-nummi. Rome, late 5th-early 6th century, 5.81 g. [IN]VIC-TA RO[MA] Helmeted and draped bust of Roma r. Rev. Wolf and twins to l.; above, I between two stars, and in exergue, *X X*. Arslan 56 ff. MEC 97-98A. MIB 71b. Ravenna 313. Edge broken away in striking. Dark green patina. Fine/Very fine 200.-
- 465 Follis of 40-nummi. Rome, early 6th century-535/536, 9.11 g. INVICT-A ROMA Helmeted and draped bust of Roma r. Rev. Eagle standing l., head turned back to r.; to l., XL, and in exergue, . Γ. (= officina 3). Arslan 86 var. MEC 100 ff var. MIB 74a. Ravenna 318-319 var. This officina seems quite scarce.
Uncleaned with a green patina. Good fine 125.-
- 466 Follis of 40-nummi. Rome, early 6th century-535/536, 10.68 g. IMVIT-A ROMA Helmeted and draped bust of Roma r. Rev. Eagle standing l., head turned back to r.; to l., XL, and in exergue, . D. (= officina 4). Arslan 51-55 var. MEC 100-109 var. MIB 74 var. Ravenna 318-319 var.
An interesting variant with this obverse inscription. Olive-green patina. A clear and attractive example.
Good very fine 650.-

The obverse inscription is not merely an engraver's mistake for INVICTA ROMA, but, in fact, reflects contemporary pronunciation.

Amalasuntha, 534-535

- 467 Quarter-siliqua, Ravenna, AR 0.59 g. [DN IVSTINI]-ANVS AVC Diademed and cuirassed bust r. Rev. Monogram of Theoderic within wreath. Arslan 176 (Witigis). Kraus 3 (Hildebad). MEC 138. MIB 59 (Witigis). Ravenna 333 (Witigis).
Very rare. Chipped on reverse and off-centre, otherwise extremely fine 500.-

The attribution of this coin to the ambitious Amalasuntha, daughter of Theoderic, mother of the ineffectual Athalaric, and shortly to be murdered wife of Theodahad, seems absolutely secure. Theodahad had his own coinage and Witigis, to whom coins of this type were commonly ascribed, was fighting Justinian's armies: thus it is highly unlikely he would have placed his enemy's name on his own coins! In addition, the use of the great Theoderic's monogram would have reminded the viewer of Amalasuntha's ancestry, while the use of Justinian's name would suggest Imperial support.

Theodahad, 534-536

- 468 Quarter-siliqua, Rome, 534-536, AR 0.61 g. DN IVSTI-NIAN AVC Diademed and cuirassed bust r. Rev. DN/THEODA/HATHVS/REX within wreath. Arslan 158. Kraus 7. MEC 139. MIB 54.1. Ravenna-.
Corroded surfaces with some flaking. About very fine 100.-
- 469 Quarter-siliqua, Rome, 534-536, AR 0.64 g. As last. Edge chip, otherwise very fine 150.-

- 470 Folles of 40-nummi, Rome, 534-536, AE 12.13 g. DN THEO-DAHATVS REX Bust of Theodahad with short moustache to r., wearing closed crown adorned with pearls and two stars, and robes richly ornamented with pearls or jewels. On his chest, jewelled pectoral cross. Rev. VICTORIA-PRINCIPVM/S-C Victory standing r. on prow of galley, holding wreath in r. hand and palm with l. Arslan 159 161 var. BMCV 22 = Kraus 32 (same obverse die). MEC 141-143 var. MIB 81. Ravenna 330 var.

Rare. Deep green patina. A magnificent example, possibly the finest known. Good extremely fine 4,500.-

Illustrated on colour plate 4.

Aside from the famous triple solidus gold medallion of Theoderic now in Milan, and some exceedingly rare half-siliquae of Odovacar, this is the earliest portrait of a Germanic ruler on a coin; and in some ways it is very possibly the finest coin portrait of any ruler of late antiquity. Theodahad's vacillating, greedy and luxury-loving character can easily be seen in the plump features, carefully trimmed hair and moustache, and pinched look of the bust on the coin. Of some interest is the very prominent pectoral cross which appears as part of Theodahad's regalia. Such a cross is very rarely encountered on either facing or profile Imperial issues (save for a series of folles of Justinian from Carthage produced at roughly the same time as this coin). On the contrary, it is always found on the extensive series of Visigothic imitative gold tremisses which probably began soon after Theoderic assumed the regency of the Visigothic kingdom for his grandson Amalaric in 508. In the case of Justinian's issues it has been suggested that the cross reflects his orthodoxy in the face of the Arianism of the recently defeated Vandals. Concerning Theodahad and the Visigoths the interpretation is very possibly the opposite: the Goths were by tradition Arians, and the prominent position given to the pectoral cross appearing on the busts on their coins may well show their confidence in the correctness of their own "orthodoxy" as opposed to that of the Empire.

- 471 Folles of 40-nummi, Rome, 534-536, AE 10.36. A piece similar to the last, and struck from the same obverse die.
Dark, blackish-green patina. Very fine 1,250.-

Ex R.N. Bridge collection, Glendining sale, 7th March 1990,339

- 472 Quarter-folles or decanummium, Ravenna, 534-536, AE 3.33 g. INVICT-A ROMA Helmeted and draped bust of Roma r. Rev. DN/THEODA/HATHVS/REX all within wreath. Arslan 162-170. MEC 144. MIB 82. Ravenna 331.
Green patina. Good fine 125.-

Witigis, 536-540

- 473 Decanummium, Ravenna, 536-540, AE 2.99 g. FELIX R-AVENNA Turreted and draped bust of Ravenna r. Rev. Monogram of Ravenna in wreath; below, X (= 10). Arslan 67-81 (Rome). MEC 145-149. MIB 72a (Rome). Ravenna 315.
About very fine 225.-

The case for ascribing the FELIX RAVENNA decanummia to Ravenna, rather than to Rome, has been convincingly made in MEC, p. 33. It is really quite hard to accept that the full name of Ravenna, her figure, and her monogram, should appear on a coin struck in Rome. These coins can be viewed as a continuation of the Roman "municipal" issues after the fall of Rome to Belisarius in late 536. Ravenna fell to Imperial forces in 540, never again to return to Gothic hands.

- 474 Decanummium, Ravenna, 536-540, AE 2.49 g. [FELIX R]-AVENNA Turreted and draped bust of Ravenna r. Rev. Monogram of Ravenna in wreath; below, X (= 10). Arslan 67-81 (Rome). MEC 145-149. MIB 72a (Rome). Ravenna 315.
Good fine 150.-

- 475 Decanummium, Ravenna, 536-540, AE 3.50 g. Similar to the last.
Attractive green patina. Obverse slightly mis-struck, otherwise very fine 150.-

Baduila (Totila), 541-552

- 476 Decanummium, Rome, 549-552, AE 3.74 g. DN BAD-VILA REX Facing bust of Baduila wearing closed crown and elaborate robes. Rev. DN B/ADV/ILA/REX all within wreath. Arslan 201-202. MEC 157. MIB 89a.
Blackish-green patina. About very fine 200.-

- 477 Decanummium, Rome, 549-552, AE 3.74 g. Similar to the last but with a different style of obverse bust. Arslan 199. BMCV 41-42. MEC 158-160. MIB 89b.
Light green patina. About very fine 200.-

- 478 Decanummium, Rome, 549-552, AE 3.64 g. DN BAD-... Facing bust of Baduila wearing closed crown and elaborate robes. Rev. [FLOREAS]-SEMPER Baduila standing r., in military dress, holding spear in r. hand and resting l. on shield; to r., X. Arslan 205. BMCV 47-49, MEC 162. MIB 90b. Rough green patina. Very fine 250.-

There seems to be no little debate over the mint attribution of Baduila's bronze coinage. The text of MEC ascribes all the inscription in wreath decanumia of Baduila to Pavia and the standing figure reverses to Rome. However, some obverses of both types seem to link up stylistically (if not, in fact, sharing the same dies, cf. nos. 476 and 478 above) so a break between the two groups seems unlikely. The possibility that both groups were produced in both mints (note the great difference in portraiture between nos. 476 and 477 above) should also be borne in mind.

Justinian I, 527-565

- 479 Solidus, Rome, c.542-c.546(?), AV 4.47 g. DN IVSTINI-ANVS PPAVC Helmeted and cuirassed bust facing, holding globus cruciger in raised r. hand and with shield over l. shoulder. Rev. Very fine/about extremely fine 500.-
- The mint attributions for the Italian precious metal coinage of Justinian's middle years are rather confused and controversial. Kent (1982) is the best summary but it is so short and compressed that some of his conclusions seem rather ambiguous. For example, it was only with the Monte Judica hoard publication (MJ) that Justinian's Sicilian issues could be separated from those of Ravenna, thus requiring a number of reattributions throughout the series. This piece is apparently given to Rome by Kent, and definitely placed there by the MIB, but its closest parallels are bronze 10-nummi pieces termed "Uncertain Italian Mint (Ravenna?)", Kent(1982) 70 and Ravenna 110, or definitely ascribed to Ravenna, MIB 237. In any event the obverses were designed by the same die-cutter (note the distinctive wreath ties).
- 483 Tremissis, Ravenna, late 550s(?) -565, AV 1.44 g. DN IVSTINI-ANVS PPAVC Diademed, draped and cuirassed bust r. Rev. VICTORIAAVCVSTORVN Victory standing facing, head l., holding wreath in r. hand and globus cruciger in l.; to r., star; in exergue, CONOB. DOC-. MIB 41.2. S 312D. An attractive example. DOC 241, 243. MIB Km.4, Km.6. S 882, 884.

An attractive pair with green patina. Very fine or better (2 pieces) 150.-

The MIB rightly notes that the countermark dies for the first piece were locally made in Sicily, while those for the second were surely made in Constantinople since the style is completely unlike that found locally. The use of imported dies or workers in Sicily can explain coins which would otherwise be attributed to the mint of the capital but which were surely struck on the island (like those of Mezezius, for example).

Constans II, 641-668

- 519 Solidus, Rome, c. 642-647, AV 4.44 g. dN CONSTAN-TINUS PP AVC Crowned, draped and cuirassed bust facing, beardless, holding globus cruciger in r. hand. Rev. VICTORIA-AVSuC Cross potent on three steps; to r., K; to l. of the base of the cross, pellet; in exergue, CONOB. DOC 10a var. (Heraclonas). MIB 112.1 (same dies). S 1117.

The Coinage of the Visigoths and the Byzantines in Spain

- 560 Solidus in the name of Valentinian III, Southern Gaul, c. 450s, AV 4.40 g. DN PLA VALENTI-NIANVS PF AVG Diademed, draped and cuirassed bust r.; above, crown of annular form. Rev. VICTORI-A AVCCC Crowned and armoured figure of the emperor standing facing, r. foot on the head of human-headed serpent, holding long, cross-topped sceptre in r. hand and globe surmounted by Victory in l.; in field to l. and r., R - V. Depeyrot 7. Kent(1991) Imitative Series 2 (Pl. 19, 44). MEC 168 var. Grafitto on obverse. Good very fine 900.-

There are a considerable number of solidi which imitate official issues of Valentinian III and other emperors of the fifth century, and which are of undoubted Gallic origin. Our piece belongs to an extensive group, long attributed to the Visigoths, bearing a small wreath-like crown ("les solidi à la couronelle") above the portrait on the obverse. Recently, however, a great deal of controversy has surrounded these coins. A number of French scholars have suggested that these imitations of Valentinian were struck by Roman military authorities in Gaul; specifically by Aetius and his successors (ably summarized by Depeyrot, MEC pp. 44-46, and in DOC pp. 236-237). This is an extremely attractive theory but Kent(1991), following his survey in Kent(1989), has convincingly refuted it. He points out how exceptional it would be for a Roman authority to issue coins under a 'false' mintmark, and he does not accept that there was any official prototype bearing a crown above the emperor's head. He suggests that the crown signifies Visigothic recognition of the emperor's higher position vis-à-vis their own royalty.

Illustrated on colour plate 4.

The Byzantine coinage of Spain is the rarest series of all those issued by the Eastern emperors. With the exception of Tiberius II,

there are tremisses known for all the emperors from Justinian to Heraclius, but they are so uncommon that not even the greatest collections have them (neither Hunt nor Ratto had even a single specimen; Kapamadjhi had a single piece of Heraclius, though it was wrongly identified). The attribution of these coins to Spain is absolutely secure: every coin whose provenance is known comes from there, and their debased alloy and thin flans are very similar to those of contemporary Visigothic issues.

The Frankish coinage of Gaul

- 568 'Argenteus', Rhineland area, c. 450 (?), AR 0.31 g. D VANTV-ITAVC Diademed, draped and cuirassed bust r., with prominent jewel at the top of the head. Rev. AV-IAVI Figure seated (?) to l., holding Victory in outstretched r. hand and resting l. on long cross-tipped sceptre; to l., star. Cf. King Pl. A, 5-6 (the prototypes). Cf. Mitard la.
Rare. Holed as usual, otherwise toned, uncleaned and good very fine 500.-

During the fifth century a variety of unusual silver issues, usually of very light weight, were produced somewhere in north-western Gaul. Some, of relatively good style and literacy, have been ascribed to a shadowy Roman authority, perhaps Aetius and his successors, but this is not universally accepted. In any case, most of the known examples tend to be found pierced or mounted for suspension and often turn up in graves of the period. This piece is clearly a later copy of the earlier, more literate (though equally unofficial) issues described by King. The lack of a copied mint mark is intriguing.

- 569 Solidus in the name of Theodosius II, uncertain mint, mid-5th century, AV 4.38 g. DN THEODO-SIVS PF AVC Helmeted and cuirassed bust three-quarter facing, holding spear in r. hand and with shield over l. shoulder. Rev. VOT XX-MVLT XXX Victory standing l., holding long jewelled-voided cross; to l, star, and in exergue, CONOD. Possibly unpublished. Somewhat crudely struck. Good very fine 1,000.-

This enigmatic coin copies a Constantinople issue of 420/21 without officina letter, as DOC 353. It could well come from the Balkans.

- 570 Solidus in the name of Julius Nepos, uncertain mint (Frankish?), c. 480, AV 4.40 g. DN IVL NE-POS PF AVC Helmeted and cuirassed bust three-quarter facing, holding spear in r. hand and with shield over l. shoulder. Rev. VICTORI-A AVCCC Victory standing l., holding long voided cross; to l. and r., R - V, and, in exergue, ONOB. Possibly unpublished. Crudely made, otherwise about extremely fine 2,500.-

Stylistically, this coin copies Milan issues of Leo I (DOC 591) and Julius Nepos (DOC 951). The Ravenna mintmark is an unexpected addition. The flat-struck face on the obverse often appears on Frankish issues of the 6th century (as on many pieces in the Chinon hoard) and this piece is remarkably reminiscent of them.

Theodebald I, 548-555

- 571 Nummus, Marseille, before c. 550, AE 2.29 g. Monogram of Theodebald within laurel-wreath. Rev. Chi-Rho within wreath. Brenot V, pl. XVIII, 9. Garrett II, 682. Very rare. Dark patina, a clear example. Very fine 1,000.-

Copper coins were produced in Provence during the first half of the 6th century, initially under the Ostrogoths and then under the Merovingians or, in a semi-autonomous way, by the city of Marseille. The coins very seldom appear on the market with most being found during archaeological excavations in Marseille itself. While we have no published provenance for this coin, it comes from a collection formed during the first half of this century. Aside from the Garrett coin, sold in 1984, and a second, holed, example (said to be from Tunisia) sold privately in London, this is the only example of a copper of Theodebald to come up for sale in a generation.

Byzantine-Papal Siliquae of Rome

The term 'Papal Imperial' has usually been taken to refer to the silver papal coinage struck in association with the Carolingian emperor (after A.D.800), and the term 'Papal' to the coins struck alone (without reference to the Carolingian emperor). It now seems that a new term is required to deal with what is virtually a new and earlier series; a coinage struck by the popes in association with the Byzantine emperors. An article has already been published referring to a new Papal Siliqua: "A New Papal Imperial Issue" (cit.below) which can only give rise to confusion. The writer favours the term 'Byzantine-Papal'. The general term 'antiquiores' has traditionally been used to refer to the coinage ('Papal' and 'Papal Imperial') separated by over three hundred years from the main papal series which commenced under Boniface VIII (1294-1303) and which term would still include the 'new' Byzantine-Papal series.

Among the more important points are the papal monograms and signatures which appear on the coins in association with representations of the Byzantine emperors. Striking coinage has always been regarded as a decisive mark of sovereignty, and the implications for temporal sovereignty being in the hands of the popes nearly a hundred years earlier than any historian has previously suggested are staggering. (even the titles of some works reflect a later date - e.g. the authoritative study on the origins of the papal state by L. Duchesne, *The Beginnings of Temporal Sovereignty of the Popes 754-1073*, 1900.) These small silver coins, to use the rather sensational terminology in the *Daily Telegraph* item (Sept. 12th, 1986), "are expected to prompt the rewriting of a chunk of mediaeval (Dark Age) history". Their significance has been underlined by an award from the French Academy (*Le Prix Duchalais* 1986) for the preliminary publication. One of the most eminent scholars in this field, probably of this century (Professor Grierson), has already observed in private correspondence that "the material is amongst the most important that has ever been published in the mediaeval field".

The listing in this series is extremely interesting, as apart from adding as many as a third again to the number of examples of this denomination known, it produces a considerable number of novelties. These include monograms for Popes Vitalian and Adeodatus, a monogram variously attributed to Eugenius, Sisinnius, or a Pope Stephen, signed coins for Popes Sergius I, Gregory II or III and Zacharias; recognition of a new form of combined monogram for Tiberius III, and a new complete monogram for Rome. It also offers evidence for reattribution of previously wrongly assigned coins, revealing in the process a papal signature for Pope Constantine; amendments to and confirmation of some of Sabatier's line drawings; and indications for fairly precise dating for a number of different issues. It also includes an issue which may reasonably be attributed to Anastasius II. In the process it becomes apparent that the square coppers issued by Popes Gregory and Zacharias usually regarded as tesserae or weights are in all probability coins. To the foregoing remarks from the preliminary article may be added: the newly discovered coin of Constantine IV which displays as a reverse type the combination of the emperor's name and denomination, and confirms therefore both the denomination of these silver coins as siliquae of two hundred and fifty nummi (cf. Kent) and the various attributions to Constantine IV (Vitalianus, Adeodatus etc.); a new type for Leontius; the discovery of a transitional issue for Justinian II (not included in the hoard, but wrongly attributed in the Kapamadjí catalogue and in the Bourgey sale); and the possible attribution of a coin to the rebellion of the Exarch Olympius, with all that this implies for the treason of Pope Martin.

One explanation for the extreme rarity of these papal coins could be that they are a special commemorative coinage, struck only on certain occasions. The view that these issues may represent a ceremonial coinage has also been expressed by Michael Hendy in private correspondence. The scattering of donative coins other than by emperors was specifically in silver according to Justinianic law (cf. Hendy pp.192-5, cit. below, and SNR note 82, p.128). See also T.S. Brown (cit. below), where it is observed: "In the seventh century the clerical élite of Rome maintained Roman traditions by scattering largesse in the manner of the old consuls" (pp.35 and 158, also 137). It has been unclear how these papal siliquae were related to the debased *potin* or copper *solidi* struck in Rome in the early eighth century. If, however, the coins were of a special donative or commemorative nature there would be no need for a precise relationship - a modern parallel may be seen in the issues of 'Maundy money'. It has been suggested in *DOC* (1, p.9) before publication of this find - that ceremonial coins struck for distribution on such occasions as accessions, anniversaries, marriages or victory celebrations and consulships practically came to an end in the seventh century. This will now have to be modified to: "practically came to an end in the eighth century".

The coins were on exhibition before publication at the *Munzkabinett* in Winterthur, Switzerland in 1984 and were available for some years at the British Museum to interested students and scholars. A monograph on this series is unfortunately, still in the course of preparation, and will have contributions from most of the leading figures in the field. In this respect, any observations, critical or otherwise, from those familiar with the period would be most welcome, and should be addressed to M.D.O'Hara c/o The Department of Coins and Medals, British Museum, London. Copies of all correspondence relating to the coins are deposited in the archives at the British Museum and in the Ashmolean Museum and is available for study, to interested scholars and students.

Heraclonas, 641

Pope John IV, 640-642

572. Siliqua, 641. 0.206g. vi. Crowned (?) beardless bust facing, wearing chlamys. Border of extended triangular wedges clockwise. Rev. RM in monogram combined with a short barred cross (monogram number two). Linear border. O'Hara 1 (this coin). S 1124 (this coin). Unique. Weak obverse, otherwise about very fine 1,500.-

A certain reluctance to accept any attribution of coinage to Heraclonas has been shown by some scholars, but although the copper coins previously attributed to Heraclonas have now been demonstrated to belong to Constans II, the attribution of the gold is quite another matter and the Heraclonas attribution is still accepted by most scholars, and in particular by Professor Grierson (see *Byzantine Coins*, 94, 110, 123/4 and 142). There have been no silver coins previously attributed to Heraclonas.

The provisional listing under Heraclonas is suggested as the beardless bust is small and neat (similar to that on the Roman solidi of Heraclonas) and completely different from SNR types 3 and 4 below. This together with the linear border on the reverse (a feature otherwise more usual at a later period on the siliquae of Leontius and Tiberius III) and the cross with a short bar seem to separate this issue. Apart from the linear border the style does not fit a listing under Anastasius II.

The most characteristic border in this series consists of 'triangular wedges', usually overlapping, but sometimes extended, pointing, either clockwise or anticlockwise. Other types of border which occur are: 'pelleted'; 'Pellet and bar' (very common at the mint of Naples - Grierson has already remarked on the close similarity between the products of Rome and Naples in *Byzantine Coins*, p. 144); 'reel' and 'wreath'.

Constans II, 641-651

Popes John IV, 640-642 and Pope Theodore, 642-49

573. Siliqua, 641-647(?). 0.141g. vii. Crowned beardless bust facing, wearing chlamys and crown with two layers. Pellet and bar border. Crude style. Rev. RM in monogram combined with a long barred cross (monogram number four). Border of overlapping anti-clockwise triangular wedges. O'Hara 2 (this coin). S 1125 (this coin). Unique. Edge chip, very fine 1,500.-

Popes Theodore, 642-49 and St. Martin, 649-54

574. Siliqua, 647-651(?). 0.272g. vi. Crowned bust facing with short beard, wearing chlamys. Reel border. Rev. RM in monogram combined with a short barred cross (monogram number two). Pellet and bar border. O'Hara 3 (this coin). BMC 381/2, pl 35, 6 (Constans II) = MIB 75 (Constantine IV) = DOC 80a (Constantine IV). S 1125A var. Seven examples of this type noted. Very rare. Some die rusting and very fine/extremely fine 800.-

575. Siliqua, 647-651 (?). 0.247g. v. Pellet and bar border on both obverse and reverse otherwise types as previous (but monogram number five). O'Hara 4 (this coin), otherwise references as for previous coin. Seven examples noted.
Very rare. Off-centre, otherwise very fine 600.-
576. Siliqua, 647-651(?). 0.24g. vi. Similar to 574, but different hair style, two locks of hair on the right side, otherwise types similar to previous. Monogram number two. See O'Hara, "A Type 3a Variant in the Byzantine Papal Series", NCirc forthcoming. Variant not previously noted. Seven examples of this class recorded.
Very rare. Minor edge chip, very fine 800.-
577. Siliqua, 647-651(?). 0.189g. vii. Similar to previous, but bars of cross end as a cross potent. Monogram number seven. O'Hara 5 (this coin). Variant not previously recorded. Seven examples of this class noted.
Very rare. Pierced, otherwise about very fine 500.-
578. Siliqua, 647-651(?). 0.238g. vi. Similar to previous, but trefoil (?) on crown, and bars of cross end as a form of cross pattee (monogram number six). O'Hara 6 (this coin). Variant not previously noted. Seven examples of this class recorded. (S 1125A).
Very rare. Some weakness, very fine 800.-

Although Hahn and Grierson have listed the one recorded specimen of the short bearded type (hoard numbers 3 to 7) under Constantine IV, the existence of O'Hara 2 (beardless bust) of very similar type and workmanship to O'Hara nos. 3 to 6 (no globus cruciger) but quite different to the beardless bust types (some with globus cruciger) listed under Constantine IV (MIB 73 = Berlin [with gl. cr.] and DOC 80b - see O'Hara nos. 11, 12 and 13), suggests that the original attribution of Wroth in BMC is the correct one.

Olympius, Exarch of Italy 651-2

Pope St. Martin, 649-54

579. Siliqua, 651-2. 0.248g. vi. Facing bust wearing crown, cuirass and paludamentum. Military dress and totally different treatment of the crown beard and hair to that of the four preceding coins. Pellet and bar border? Rev. border of anti-clockwise triangular wedges, otherwise type as SNR numbers 3 and 4 (monogram number two). O'Hara 7. For the attribution of this coin and the implications for the treason of Pope Martin see "Further to the Find of Byzantine Silver from the Mint of Rome for the Period 640-750", Proceedings of the 10th INC (1989), pp.321-6, at pp.321-3. SCMB (1986) pp. 334/5, a brief report on one aspect of the paper presented at the 10th INC on the Olympius attribution. See also O'Hara, "Numismatic Evidence for the Treason of Pope Martin, A.D.649-654", The 14th Annual U.S. Byzantine Studies Conference, Houston (Oct.1988), Abstracts of Papers p.53. Previously unknown.
Unique and important. Very fine/extremely fine 6,000.-

The significance of this type was overlooked in the preliminary SNR publication but is discussed fully in the articles and papers referred to above. The obverse clearly depicts an effigy in military dress and with a completely different portrait from that of the ruling Byzantine emperor Constans II. The type fits chronologically and stylistically to the time of the revolt of the military governor of Italy, the Exarch Olympius in AD 651/2. Olympius had been instructed to arrest Pope Martin, but after having failed in this attempted to set up an independent kingdom. It is the opinion of some historians that he was fully supported in this by Pope Martin. This coin is primary evidence in support of this view.

A military style of dress is not usual on the coinage of Constans II. The last occasion a facing military effigy appeared was on the first gold issues (610-13) of Heraclius and a little later on the copper, and was not to appear again, apart from three exceptions, for nearly three hundred years.

It is interesting to note that the trace elements in the metal composition show a higher proportion of tin and antimony than that of the coins of Constans II: Sn 0.56 as opposed to 0.03 - 0.08; and Sb 0.10 compared to 0.01 - 0.04 (cf. Morrisson and Barrandon cit. above). In fact the highest level of antimony to that of any coin in the hoard. This could suggest different moneyers and/or different mint procedures for this issue.

See the notes below to the siliqua of Constantine IV with spear and civilian dress.

Constans II, 651-668

Popes St. Martin, 649-54, St. Eugene I, 654-7 and St. Vitalian 657-72

580. Siliqua, 651(?) - 668. 0.329g. vi. Bust with long beard, facing, wearing chlamys and crown with trefoil; holding globus cruciger in left hand. Pellet and bar border. Rev. RM, Greek cross above, six-pointed star below (cf. monogram chart number twenty). Heavy wreath border. O'Hara 8. S 1125B var. There are nine examples of the 'long beard' class now noted, but this variant, without fragmentary inscription, was previously unknown.
Extremely rare. Weak in parts, otherwise about extremely fine 1,250.-
581. Siliqua, 651(?) - 668. 0.268g. vi. Crowned bust with long beard, facing, wearing chlamys and holding globus cruciger in right hand. Fragmentary inscription. Pellet and bar border. Rev. RM, cross potent above, seven-pointed star below (cf. monogram chart number nineteen var.). Heavy reel border. O'Hara 9. BMC 379. DOC 192. CNI 15, pl. 3, 25. S 1125C var. There are nine examples of this class noted.
Very rare. Obverse struck slightly flat, reverse better than very fine 800.-
582. Siliqua, 651(?) - 668. 0.213g. vi. Crown with trefoil and eight-pointed star in reverse field, otherwise types as previous (cf. monogram chart number nineteen). O'Hara 10. Tolstoi 120 = (MIB 159 crown with cross). There are nine examples of this class noted.
Very rare. Obverse struck from rusty die, otherwise better than very fine 800.-

Constantine IV 668-85

Popes Vitalian, 657-72, Adeodatus, 672-76, Donus, 676-8, St. Leo, 682-3 and St. Benedict 684-5

583. Siliqua, ca. 668 (?) 0.16g. vi. Facing beardless (?) bust, wearing chlamys and distinctive two layered crown, spear held over right shoulder. Hair curved (more ornate than the later coins of Con. IV) but traces of double striking. Pellet and bar border. Rev. RM in monogram combined with a short barred cross. Monogram number two. Border composed of triangular wedges, clockwise. See O'Hara, "The last Three 'Byzantine Papal' Siliquae from The Find of Silver from the Mint of Rome", NCirc, May 1992, pp. 111-2. Previously unknown.
Unique and very fine or better 3,800.-

The more than usually ornate two layered crown is paralleled by the crown on the second type beardless bust issue attributed to Constans II (SNR type 2) and not occurring elsewhere in the series. This might suggest that the Constans coins should be reattributed to Constantine IV. The analysis of the coins attributed to Constans II, however, which shows a very high silver content would be against attributing these coins to the period after the departure of Constans II from Rome in 663, when everything of value was removed from the city, even down to the roof of the Pantheon (this presumably included all silver bullion). All the papal coins attributed to Constantine IV show a substantially lower silver content than those of Constans II - as might be expected.

The beardless bust and the Constans II curved hair style would suggest placing this issue early in the reign (although there is a heavy line for the chin and it may be that a beard was intended).

From the treatment of the right side of the chlamys it would seem as if the engraver was unsure as to whether or not a shield should have been added. The combination of civilian dress and spear is most unusual and otherwise unknown in these papal issues. As civilian dress is the norm for this series, this new coin again serves to emphasise the extraordinary nature of the 'Olympius' issue (O'Hara type 3b) where the exarch is shown wearing a cuirass. This is even more marked when one considers that of all the emperors of this period it is Constantine IV who is usually depicted in full military dress. It would seem as if the portrait was taken from the usual representation of the emperor, with the three-quarter facing bust wearing helmet and cuirass, and holding shield and spear, but as this form of dress was inappropriate, not used before or after, the military elements were changed for a crown and chlamys, but the spear was retained - possibly for identification purposes.

Pope St. Vitalian, 657-72

584. Siliqua, 668-672. 0.343g. v. Crowned beardless bust facing, wearing chlamys and holding globus cruciger in right hand. Indeterminate border, possibly pellet and bar. Rev. Elongated monogram of Pope Vitalian (monogram number sixteen). Indeterminate border, linear or pellet and bar. O'Hara 14. S 1233A var. Berman p. 32, 8 (the line drawing of the monogram wrongly drawn, the letter V inadvertently omitted). Cf also Berman - O'Hara, correspondence CNR April 1993. Three coins of this class noted.
Extremely rare. Find patina with slight corrosion, nearly extremely fine 4,750.-

A monogram representing someone other than an emperor is unprecedented for this early period. It is extremely important for the

degree of papal independence and sovereignty it implies. Few non-imperial monograms occur on seventh century coins, apart from varieties of the christogram. The important implications of this are fully discussed in the preliminary article in the SNR. See also Berman (PNH p.33), a reference to the actions of Pope Vitalian "A manifestation of the pope seizing secular power for the first time on a national level". The S of the monogram is off the flan. See the notes to the following two coins.

585. Siliqua, 668-672. 0.257g. vi. As previous. Indeterminate border on obverse and reverse, possibly pellet and bar? Smaller 'squat' monogram (number seventeen), pellet in reverse field right. O'Hara 15. S 1233A var. Berman p.32, 8. Cf also Berman - O'Hara, correspondence CNR April 1993. Three coins of this class noted.
Extremely rare. Some weakness in obverse, virtually extremely fine 4,750.-

The design of the short or 'squat' monogram (SNR type 7b), which enables the final S to appear on the flan of the coin, was presumably designed after the issue of the 'elongated' monogram type (SNR type 7a) where only the lower part of the S appears on the coin. The distinction may be easily seen by noting the position of the bar for the letter L in relation to the top of the A. See the notes to the preceding and following coins.

586. Siliqua, 668-672. 0.250g. vi. As previous. O'Hara 16 (this coin). S 1233A var. Berman p.32, 8. Cf also Berman - O'Hara, correspondence CNR April 1993. Three coins of this class noted, previously unknown.
Extremely rare. Dark find patina and weakly struck on obverse. Good very fine 4,250.-

The globus of the globus cruciger is off the flan and the cross therefore appears as if it is a separate cross in the left field. The S is off the flan on the 'elongated' monogram (SNR type 7a). In general during this period the dies were too large for the blanks. The pendants of the fibula on this type (SNR type 7) are depicted in the same manner as on two following types. The inaccurate 'Berman' line drawing was presumably based on this example, as the leg of the V is badly cut on the die, and the pellet in the field may help to give the impression of two pellets to the right of the A. See the notes to the previous two coins.

Pope Adeodatus, 672-76

587. Siliqua, 672-676. 0.234g. vi. Crowned (?) bust facing, wearing chlamys and holding globus cruciger in right hand. Indeterminate border. Rev. monogram number ten (Pope Adeodatus). Border of overlapping triangular wedges, clockwise. O'Hara 17 (this coin). S 1233B (this coin). See Luciana Cuppo-Csaki, "The Catacomb of Domitilla and the Cult of Martyrs in the Sixth Century and Early Middle Ages", a paper read at the 12. Internationaler Kongress für Christliche Archäologie (Bonn 22-28 September, 1991). Berman p. 32, 7. Cf also Berman - O'Hara, correspondence CNR April 1993. Unique. Weakly struck and edge slightly ragged, otherwise about extremely fine 5,500.-

Unknown previously and again very important for the extent and continuity of papal sovereignty it suggests. The same treatment of the pendants of the fibula as on the preceding and following types. The possibility does of course exist that the monogram could conceivably be read as representing Pope Agatho (678-681). However the form d for D seems clear, and it would seem safest at this stage to list the coin under Pope Adeodatus. There are two monograms described by Cuppo which are thought to refer to an 'Adeodatus', one of which appears to be a play on the classic Chrismon/Alpha-Omega

Popes Donus, 676-8, St. Agatho, 678-81, St. Leo, 682-3 and St. Benedict 684-5

588. Siliqua, 676-84? 0.33g. vi. Crowned beardless bust facing wearing chlamys and presumably holding a globus cruciger (although this is off the flan). Indeterminate border, possibly linear. Rev. to left C over N separated by a bar; to right O; above, an incomplete cross. Monogram number twenty three. Pellet and bar or pelleted border. See O'Hara, "A New Papal Imperial Issue: Not from The Find of Byzantine Silver from the Mint of Rome", SM 146, May 1987, pp.42-3. (Despite the title the coin is, in fact, from the find).
Unique. An exceptionally fine example. Toned and virtually as struck 6,000.-

Unknown previously and extremely important both for the dating and identification of the denomination. The parallel between this reverse type and the Ravenna issues of the Constans II 'long beard' class is striking - to say the least. The Constans II coins with CON or KCON around a cross have been identified by Kent as siliquae of 250 nummi. This coin confirms Kent's findings as the abbreviation for 250 (C/N) is clearly marked. The Byzantine love of double meanings is again demonstrated here with the layout of the letters referring both to the denomination and the emperor Constantine. The emperor can only be Constantine IV and would certainly seem to confirm the various other Constantine IV attributions, which in turn confirm the 'Vitalianus' attribution with all the implications for Papal sovereignty at this early date.

Pope St. Benedict, 684-5

589. Siliqua, 676-685 or 684-5. 0.315g. vi. Crowned beardless bust facing, wearing chlamys and holding globus cruciger in right hand. Indeterminate border. Rev. RM in monogram combined with a short barred cross (monogram number nine), eight-pointed star in upper field left. Pellet and bar border. O'Hara 11 (this coin). S 1233 var. For the dating of this class see O'Hara, "The Chronology of the Star Type of Constantine IV", NCirc (1988), p. 113. Three examples noted. Extremely rare. Minor flan crack, otherwise clear and virtually as struck 2,000.-

This class was previously unknown apart from the line drawing in Sabatier. See the notes to 591.

590. Siliqua, 676-685 or 684-5. 0.195g. v. As previous but style a little more crude. Longer bar to cross on reverse. Indeterminate borders, possibly pellet and bar (monogram number nine). O'Hara 12 (this coin). S 1233 var. Three examples noted. Extremely rare. Weakly struck and about very fine. 800.-

For the dating see O'Hara, "The Chronology of the Star Type of Constantine IV", NCirc (1988), p. 113.

591. Siliqua, 676-685 or 684-5. 0.171g. vi. As previous (monogram number nine), but star has seven points. Indeterminate borders. This variant was previously known only from a line drawing in Sabatier, p. 268, 17, pl. 28, 22 with a seven-pointed star and no globus cruciger, listed there under Heraclius. Sabatier 17 = DOC 80b (dated 668-685) = MIB 74 (dated 668-674) = Tolstoi 44 (under Heraclius, p. 663). O'Hara 13 (this coin). S 1233 var. Three examples of this class noted. Extremely rare. Slightly corroded and edge chipped, fine to very fine 600.-

The existence of SNR numbers 11, 12 and 13 (type 6) with the emperor holding a globus cruciger, can only cast doubt on the detail of Sabatier's line drawing, but at the same time the basic type is confirmed. A seven-pointed star is confirmed with SNR number 13. A six or eight pointed star was originally a monogram of I and X (Jesus Christ) with or without a cross. A cross with an X superimposed, or a vertical bar with an X superimposed - the form with a horizontal bar with an X superimposed seems to have no meaning (DOC II, 1, pp. 109-110). The seven pointed star on SNR number 13, confirming Sabatier's line drawing, is probably an engraver's error. It would seem quite logical for the pope eventually to replace the monogram of Christ's name in the top left position with his own initial. For example, on the later issues with S (Pope Sergius), Z (Pope Zacharias), and a Byzantine G (Pope Gregory III). The pendants of the fibula on the chlamys are crudely depicted. This distinctive feature links this type with the two previous types (SNR types 7 and 8).

Justinian II, first reign, 685-695

Popes John V, 685-686 and Conon, 686-687

Papal pretenders Peter, 686, Theodore, 686 and 687 and Paschal, 687

592. Siliqua, 685-687. 0.259g. vi. Crowned beardless bust facing, wearing chlamys and holding globus cruciger in right hand. Pelleted border. Rev. RM, cross above (cf. monogram chart number twenty two). Pellet and bar border. O'Hara 18 (this coin). BN 1 (under Constantine V) = MIB 43 = Ricotti Prina pl. 17, 84 (under Constans II). Ratto 1548 (under Constans II) = DOC 65 (under Justinian II's first reign). S 1308 var. Six examples of this class noted. Very rare with find patina. Nearly extremely fine 1,250.-

The dating for this class is suggested on the evidence of the signed coin of Sergius (687-701). If Popes John V (685-686) or Conon (686-687) were unwilling to strike coins using their own name it would seem quite logical that they revert to a traditional type with RM.

593. Siliqua, 685-687. 0.194g. vi. As previous (cf. monogram chart number twenty one), but reverse with pelleted border. O'Hara 19 (this coin). S 1308 var. See references to previous coin. Six examples of this class noted. Very rare. Weakly struck, otherwise very fine 800.-

594. Siliqua, 685-687. 0.212g. v. As previous, but slightly larger head and reverse with border of triangular wedges anti-clockwise, otherwise types as previous (cf. monogram chart number twenty one). O'Hara 20 (this coin). S 1308 var. See references to number twenty-one. Six examples of this class noted. Very rare. Find patina and slightly corroded, but good very fine 800.-

595. Siliqua, 685-687. 0.24g. v. As previous, indeterminate borders. (See monogram chart number twenty one.) O'Hara 18-20 (this example not from the hoard). S 1308 var. Six examples of this class noted.
Very rare. Crystallised silver. Fine to very fine 500.-

See the notes to the first coin of this type, Pope St. Sergius I, 597.

596. Siliqua, 687-695. 0.140g. vi. Crowned beardless bust facing, wearing chlamys and holding globus cruciger in right hand. Linear border. Rev. full monogram for Rome, S in upper field left. Monogram number eleven. Linear border. O'Hara 21 (this coin). S 1308A (this coin, ther attributed to Pope Sergius). Berman p. 32, 6. Cf also Berman - O'Hara, correspondence CNR April 1993.
Unique. Slightly off-centre but nicely toned and with an extraordinary portrait. Nearly extremely fine 4,750.-

It will be noted that the beardless bust was in use on the metropolitan coinage until 687 and that we may therefore possibly expect to see coins with a bearded bust with the signature of Pope Sergius appear in time. This coin (SNR number 21) certainly bears little resemblance to the rather crude workmanship shown by the coins of the first two issues. The similarities are remarkable both in style and the general superior workmanship between this coin and the work of the anonymous master-engraver who designed the "good style" bust of the last gold issues of Constantine IV and the "good style" Constantinopolitan solidi of Justinian's beardless bust issues (DOC II, 2, p.530, 12-15; and p. 575, 1-3).

Leontius, 695-698

Pope St. Sergius I, 687-701

597. Siliqua, 0.18g. v. Crowned bust facing wearing chlamys and holding globus cruciger in right hand. Linear border. Rev. RM in monogram combined with a cross (monogram number two). Linear border. Cf. M. O'Hara, "The Thirty-second Silver Coin from the Find of Byzantine Silver from the Mint of Rome", NCirc, Feb. 1987, pp.4-5, fig 1 (this coin). Previously unknown.
Unique. Broken and glued together, poor to fine 800.-
598. Siliqua, 0.205g. v. Crowned bearded bust facing, wearing loros and holding mappa in right hand. Linear border. Rev. RM, cross potent above (cf. monogram chart number eighteen). Linear border. O'Hara 22 (this coin). S 1351 var. MIB 30. Sabatier 5 = DOC 24 = Tolstoi 44. Ricotti Prina 59 (under Phocas). Six examples noted.
Very rare. Obverse struck slightly flat, very fine 1,250.-

Tiberius III, 698-705

Popes St. Sergius I, 687-701 and John VI, 705-7

599. Siliqua, 0.150g. v. Crowned beardless bust facing, wearing chlamys and holding spear across the front of the body. Linear border. Rev. Combined monogram for Tiberius and Rome (monogram number twelve). Linear border. O'Hara 23 (this coin). S 1404A var. MIB 71 = Turin. Three examples noted.
Extremely rare. Somewhat corroded and crystallised silver, fine 800.-
600. Siliqua, 0.271g. vi. As previous. O'Hara 24 (this coin). S 1404A. MIB 71 = Turin. Three examples noted.
Extremely rare. Dark tone and slightly rough surfaces. Very fine 1,500.-

Hahn has read the monogram on the specimen in Turin as a simple monogram for Tiberius (the M read as an S) with no reference to the city, a reading which in itself would be very unusual for the Rome mint (cf. DOC I, p. 21). The coins of Tiberius combining his name with that of Rome are indeed uncharacteristic and most unusual. An imperial monogram of any kind is most unusual for Rome. See also DOC p.108 where it is remarked that no imperial monograms were used at Carthage or Rome under Justinian II, second reign, 705-711.

Justinian II, second reign 705-711

Pope Sisinnius, 708

601. Siliqua, 708. 0.225g. vi. Crowned beardless (?) bust facing, wearing chlamys (?) and holding globus cruciger in right hand. Crude style. Reel border. Rev. Cross monogram, with large S to the left (monogram number fourteen). Pelleted border. O'Hara 25 (this coin). S 1444 A (this coin, attributed to Sisinnius). CNI 18 (1939), pl. 12, 26 (Princes of Capua and Beneventum, p.243). Berman p. 32, 9. Cf also Berman - O'Hara, correspondence CNR April 1993. On the various attributions of this coin cf. M. O'Hara, "Further to the Find of Byzantine Silver from the Mint of Rome for the Period 640-750", Proceedings of the 10th INC, 1990, pp.323-325. Two examples of this class are known.
Of the highest rarity. Crystallised silver and off-center, otherwise good very fine 3,800.-

Variously attributed to Sisinnius 708, Eugenius 654-57 and Stefanus 752-7. The various arguments were laid out in a paper presented before the The 10th International Numismatic Congress, September, 1986 (cf. volume of proceedings, 1989, pp.321-6, at pp.323-5).

Pope Sisinnius reigned for only twenty days, and it seems remarkable, bearing in mind his age and infirmity, that coins should have been struck in his name, let alone that any should have survived. There is, however, a lead seal with the name of Pope Sisinnius in a private collection in Italy, as yet unpublished.

The top of the cross is barely discernible, giving rise to modern readings (CNI) of the monogram as Stefanus - the top of the cross being misread as the bar of the T. A similar miscalculation in the size of the design seems to have occurred on one of the types attributed to Vitalianus (SNR type 7a). However, for this monogram (SNR no.25, type 14) although there is no A, Stephen III must remain a possibility - even if stylistically improbable.

Pope Constantine, 708-15

602. Siliqua, 0.255g. vi. Crowned bust facing wearing loros. Indeterminate border, possibly wreath. Rev. K combined with a cross, eight-pointed star in field left. Monogram number fifteen. Heavy wreath border. Tolstoi 25 (Con. V) = DOC 44 (Con. V) = Ricotti Prina 142 (under the anti-pope Constantine). Tolstoi 26 (Con. V) = Ricotti Prina 143 (anti-pope Constantine). Ricotti Prina 142a (anti-pope Constantine). CNI 15, pl. 3, 22 (Con. V); and also CNI 18 (1939), pl. 12, 25 (under the Princes of Capua and Beneventum, p. 243, two different attributions for the same coin). Also Grierson p. 169 (724) (Con. V). ANS Annual Report (1981), p.15, 15 (Con. V). S 1444B var. (correctly attributed). Ten examples noted. Very rare. Crystallised and corroded metal. Poor to fine 800.-

The arguments for the correct attribution of this class may be found in the preliminary article in the SNR pp.118-119. b. Although comparatively 'common' (ten specimens noted) this class was not represented in the hoard.

Anastasius II, 713-715

Pope Constantine, 708-15

603. Siliqua, 0.209g. vi. Crowned (?) beardless bust facing, wearing chlamys and holding mappa in left hand. Linear border. Rev. RM in monogram combined with a cross (monogram number one). Linear border. O'Hara 26 (this coin). S 1482A (this coin). Unique. Slightly rough surfaces and crystallised silver, nearly very fine 2,000.-

This coin has been attributed to Anastasius II partly on the basis of its similarity, especially in the style of the hair, with the gold issues of this emperor for Rome. This is also supported by the analyses carried out by Morrisson and Barrandon (see below).

Leo III, 717-741

Pope St Gregory II, 715-31

604. Siliqua, 717-720(?). 0.153g. vi. Crowned beardless bust facing, wearing chlamys. Linear border. Rev. RM in monogram combined with a cross (monogram number one). Linear border. O'Hara 27 (this coin). S 1534A (this coin). Unique. Crystallised silver. Fine to very fine 1,800.-

This coin is attributed to the early part of Leo III's reign on the basis of its similarity in the treatment of the hair with that of Leo's Rome solidi. The attribution is also supported by the results of Morrisson and Barrandon's analyses (see below).

605. Siliqua, 720(?) - 731. 0.286g. vii. Crowned bearded bust facing, with one horizontal line on each side of the hair, wearing chlamys and holding globus cruciger in right hand. Star in field left and right. Indeterminate border. Rev. G R E O around a central cross. Monogram number thirteen. Indeterminate border, possibly triangular wedges anti-clockwise. DOC 92 = Grantley Sale 1971, 2822. BMCV p.159, notes 2 and 3, pl. 21, 17-18 (under Gregory of Benevento) = De Salis Gift and Baron Kolb Coll. 1847 (cf. also the interesting discussion, Wroth BMC p. 160). Sambon, p.113, 681 (where this issue was first properly identified as a papal coin, and where it commenced Sambon's listing of the Papal series). S 1534C var. O'Hara 29 (this coin). Berman p. 31, 2. Cf also Berman - O'Hara, correspondence CNR April 1993. Nine examples noted.

Very rare. Attractively toned and clear. Virtually as struck 4,000.-

Previously variously attributed to Gregory, Exarch of Africa, who revolted against Constans II in 647, and to Duke Gregory of Benevento (732 - 739). Its presence in this hoard provides confirmation, if such confirmation were needed, of the correctness of the reattribution of this coin from where it had languished for so many years under Benevento to its rightful place under Byzantine or "papal" Rome.

The attribution to Pope Gregory II rather than Gregory III is suggested by the analyses carried out by Morrisson and Barrandon. (see below).

606. Siliqua, 720(?) - 731. 0.39g. vi. Crowned, bearded bust, with two horizontal bars on each side of the hair, wearing chlamys and holding globus cruciger in right hand. Star in field left and right. Border of triangular wedges, clockwise. Rev. G R E O around a central cross (monogram number thirteen). Triangular wedge border, clockwise. O'Hara 29 var. See references to previous coin. Nine examples noted. See also O'Hara, "The last Three 'Byzantine Papal' Siliquae from The Find of Silver from the Mint of Rome", NCirc, May 1992, pp.111-2.

Very rare. Some obverse weakness and of crude striking, very fine 2,500.-

Pope St. Gregory III, 731-41

607. Siliqua, 731-741. 0.167g. v. Fragmentary inscription. Crowned beardless bust facing, wearing chlamys and holding globus cruciger in right hand. Pellet and bar border. Rev. RM in monogram combined with a cross, Byzantine G in upper field left (monogram number eight). Pelleted or pellet and bar border. O'Hara 28 (this coin). S 1534B (this coin). Berman p.31, 1.

Unique. Some minor die rusting, very fine 4,500.-

The attribution to Leo III has been made mainly on the basis of the treatment of the hair with the very distinctive horizontal line or lines on each side. This feature first occurs on the Rome coinage of Leo III and is continued on the Rome coinage of Constantine V: but also the bust is quite different from those of Constantine IV or Justinian II. See the previous notes regarding the Morrisson Barrandon analyses. The distinctive Byzantine form for G first occurs under Justinian II in the word REGNANTIVM (DOC 2.1, p.104). An alternative attribution for SNR no.28 would be under Justinian II with the letter representing Pope John V (685-686). The form G for Giovanni was a later development and the form I for Iohannes was more usual in this period. There are examples, however, in the late sixth century of I being used for G (cf. T.S. Brown, op.cit., in the prosopographical index, p.262, also note on p.72) Iugildus for Gugildus (AD 591), and therefore the reverse (G for I) would not be impossible.

It is unfortunate that the inscription on the obverse is undecipherable. The first two letters appear to be S I (for δ I) and the fifth letter possibly an O - which would fit precisely for the present attribution.

Constantine V, 741-775

Pope Zacharias, 741-752

608. Siliqua, 741-752. 0.148g. vi. crowned beardless bust facing, wearing chlamys, cross in field left. Border of extended triangular wedges clockwise. Rev. RM in monogram combined with a cross, Z in upper field left (monogram number three). Pellet and bar border. O'Hara 30 (this coin). S 1579 var. Berman p. 31, 4. Cf also Berman - O'Hara, correspondence CNR April 1993. Two examples extant.

Of the highest rarity. Dark find patina and slightly rough surfaces. Nearly extremely fine 5,000.-

This class (this and the following coin) was previously unknown, and is of considerable interest. Its existence shows that the silver coins at present listed in the various standard works under Constantine V for Rome, with the reverse type K combined with a cross (monogram number fifteen) and emperor wearing a loros, must be re-attributed. These coins are now listed under Pope Constantine.

609. Siliqua, 741-752. 0.114g. vi. Similar to previous (monogram number three, Z in upper field left). O'Hara 31 (this coin). S 1579 var. Berman p. 31, 4. Cf also Berman - O'Hara, correspondence CNR April 1993. Two examples noted. Of the highest rarity. Edge chip. Corroded metal. Poor 800.-

610. Square copper (18 x 18 mm.) 3.96g. vi. ZAC/ChAR/IAE in three lines within circular pelleted border. Rev. P.A/PAE in two lines within circular pelleted border. See O'Hara SNR 64, p. 126 fig.3 (this coin), for a discussion on this denomination. CNI 15, p.61, l. Serafini l. Muntoni l. Berman p.31, 5. See also CNR, forthcoming March 1993 (correspondence dealing with the publication of the Byzantine Papal Series in Berman).

Extremely rare. Nicely patinated and about very fine 1,000.-

Ex Leu/Numismatic Fine Arts, Oct. 1984, Garret II, 600, and Ratto 1930, 2547, sales.

The wide divergence of weights in the few examples known can probably be best accounted for by their being struck *al marco*. The Muntoni 'coin' is described as a coin weight (exagium) on the suggestion of Grierson. See the interesting discussion in MEC vol. 1, p.626, 1513 and notes pp. 644-5.

Copper thirty nummi

Justinian II, first reign 685-695 (?)

611. Rectangular copper, 0.955g. vi. No inscription. Beardless head and shoulder bust facing, wearing chlamys and crown with row of pellets, holding globus cruciger in right hand. Rev. XXX, in exergue MO(R retrograde). O'Hara SNR 64, p. 113, A (this coin). DOC 69 var. Cf. Murari 4 var. S 1309.

Rare. Slightly rough surfaces, about very fine 250.-

The attribution of these anonymous copper rectangular thirty nummi pieces of Rome, for the period 690-720, to particular emperors is still very difficult. The most comprehensive study remains that of Ottorino Murari. It is interesting to note Professor Grierson's comments, in view of the composition of the rest of the hoard, that the low weight combined with a relatively high value suggest that the thirty nummi pieces may have been intended as a coinage in billon rather than copper. Murari has indicated that there were traces of silver on many of the coins he listed. These coins are treated in the CNI (XV, 60, 13-17) as non-imperial issues struck in part by the Senate during the last years of Byzantine rule, 690-720.

Justinian II, second reign 705-711

612. Rectangular copper, 0.531g. vi. Large crude bust, no pellets on crown, otherwise type as previous. O'Hara SNR, 64, p.114, B (this coin). See MIB 53 = Murari 21a. Murari 14 var. S 1444C.

Rare. Corroded surfaces, good fine to very fine 250.-

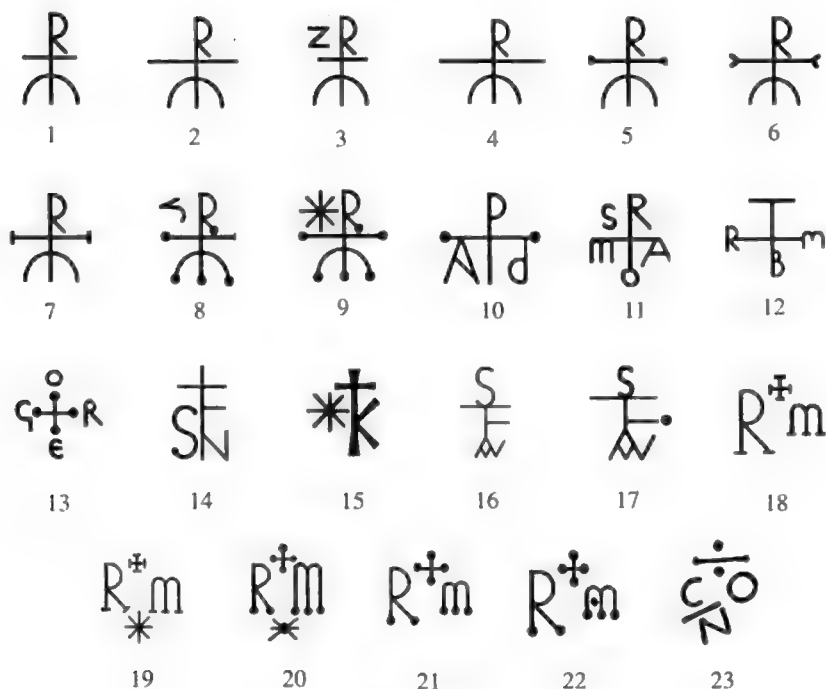

Leo III, 717-741 (?)

613. Rectangular copper, 0.242g. vi. Small neat bust, otherwise types similar to previous. O'Hara SNR 64, p.114, C (this coin). DOC 93 var. Cf. Murari 31 var. S1534D.

Rare. Corroded surfaces, fine 200.-

END OF SALE

Monograms - Byzantine Papal Series

- 1 Anastasius II - Leo III
- 2 Heraclonas - Constans II (short beard)
- 3 Olympius - Constantine IV (spear) - Leontius
- 4 Constantine V - Pope Zacharias
- 5 Constans II (beardless bust)
- 6 Constans II (short beard)
- 7 Constans II (short beard)
- 8 Constantine V - Pope Gregory III
- 9 Constantine IV
- 10 Constantine IV - Pope Adeodatus
- 11 Justinian II first reign - Pope Sergius
- 12 Tiberius III
- 13 Leo III - Pope Gregory II
- 14 Justinian II second reign - Popes: Sisinnius Eugenius? Stefanus?
- 15 Justinian II second reign - Pope Constantine
- 16 Constantine IV - Pope Vitalianus (elongated)

- 17 Constantine IV - Pope Vitalianus (squat)
- 18 Leontius
- 19 Constans II (long beard)
- 20 Constans II (long beard)
- 21 Justinian II first reign
- 22 Justinian II first reign
- 23 Constantine IV

notes

The letter M on the monogram line drawings is shown in a sloping form throughout, but on some coins with the same monogram, the M is depicted with two curves

The right leg of the R, similarly for the sake of consistency in drawing the same type of monogram, is shown the same size, but is often shown on the coins almost touching the end of the crossbar.

Morrison Barrandon Analyses

Although an extremely valuable analysis the Morrison/Barrandon chronology as presented in their paper at, the 10th INC is unfortunately a chronological based solely on a simple debasement. This approach is hardly sustainable, as it takes no account of historical events, numismatic, stylistic or other criteria. For example AD 663, the visit of Constans II to Rome when it is known that all bullion was removed from the city - even down to the roof of the Pantheon. The analysis serves to underline the distinction in silver content between the issues attributed to Constans II and Constantine IV in the preliminary publication in the SNR. And, thereby, goes some considerable way, as additional evidence, in confirming the early Papal attributions. Similarly, in AD 676, when Rome was totally devastated by plague, O'Hara 17 would seem to be confirmed in its attribution to Pope Adeodatus (672-76) as it is the coin with the lowest silver content.

Comparative Attributions

It will be noted in some instances in the Morisson/Barrandon dating, a chronology based on simple debasement, that the same type or issue is attributed to different emperors. (e.g. SNR 18, 19, and 20, and the example in the BN) This, in itself, must demonstrate conclusively that no series of attributions can be based on the criteria of chronological debasement alone.
